Version History		
Version	Date	Major Changes/Descriptions
20.3	November 1, 2020	<ol style="list-style-type: none"><li>1. Updated Error Code Z8 to include 'GQ' and 'QM' in Appendix C.3 and Appendix D.</li><li>2. Added EOC Cushion Units to the Component Tracking Reporting Requirement Dates Table in Appendix X.</li></ol>
20.2	July 1, 2020	<ol style="list-style-type: none"><li>1. Updated column headings in the Appendix C and D Edit Charts to cover the previous release period and the current release period (in this case, Jan 2020 – Jun 2020 and Jul 2020 – Dec 2020).</li><li>2. Corrected the content of Error Codes 2E, 2F, 2G, and 2H, and updated to Mandatory Reject.</li><li>3. Updated Error Code 3T to Mandatory Reject.</li><li>4. Updated Error Code 1T to add Detail Sources DC, DE, DM, and MA to the list of excluded Detail Sources.</li><li>5. Added Error Code 5Y as a new Edit.</li><li>6. Added a new Machine Priceable indicator of "H-Hybrid" to the system.</li><li>7. Updated Error Codes 1L, 1U, 2A, 2B, P2, Q, R, R2, S, U, V, Z1, Z2, Z3, and Z8 to include the new "H" indicator.</li><li>8. Updated the Notes column for the Machine Priceable Indicator field in Appendix G, section G1 to include "H=Hybrid Priceable".</li></ol>
20.1	January 1, 2020	<ol style="list-style-type: none"><li>1. Modified text in section 4.4 "Canadian Price Master".</li><li>2. Updated column headings in the Appendix C and D Edit Charts to cover the previous release period and the current release period (in this case, Jul 2019 – Dec 2019 and Jan 2020 – Jun 2020).</li><li>3. Removed Error Code 0 in Appendix C and Appendix D.</li><li>4. Added new Information Only Error Codes 2E, 2F, 2G, and 2H to Appendix C and Appendix D. Note: These four error codes will be Mandatory beginning in July 2020.</li><li>5. Corrected Error Code R in Appendix C.3 and Appendix D to utilize position 117 (not 117-118 or 118-119).</li><li>6. Updated Error Code 3T in Appendix C.3 and Appendix D to remove JD and JI from the list of Detail Sources.</li><li>7. Updated Error Code 6L in Appendix C.4 to remove "Required for Contact Type RT, IQ, IP, and EX.".</li><li>8. In Appendix Z, "Sample Documents", updated sample invoice template in Z.1 to replace "BILLED PARTY INITIAL" with "INVOICING/BILLING PARTY".</li></ol>

Z.1	Invoice Template .....	201

# 1 Data Exchange Procedures

## 1.1 Benefits from Car Repair Billing Data Exchange

The Car Repair Billing (CRB) Data Exchange System will afford each participant the opportunity to electronically accumulate individual car repair costs for accounting, auditing and analytical purposes. Implementation of the Car Repair Billing Data Exchange by the AAR/Railinc has greatly reduced these costs by automating, standardizing and centralizing the data collection and distribution processes. Efficiencies were observed in both data capture and audit function, and cost savings have become more impressive as the number of participants/subscribers continue to grow.

At present, Data Exchange files, representing over 500 marks, arrive at Railinc for processing. On a monthly basis, these files contain over 1 million car repair records and represent over \$100M in car repair data. This centralization and distribution process represents a powerful tool for Railroads, Equipment Owners and Third Party Providers in communicating and reconciling account data.

### 1.1.1 Additional Data Exchange Submission Benefits

- A. Consistency to ensure that all subscribers comply with AAR pricing procedures.
- B. Low data capturing costs as the Data Exchange minimizes the need to manually enter Billing Repair Data (BRCS) payable prior to internal audit.
- C. Potential reduction in auditing costs by minimizing data entry and eliminating manual auditing of bills payable.
- D. Potential increased recovery by providing an economical means to prevent revenue lost through improper billing charges.
- E. Electronic data submission supports in house auditing functions.
- F. Increased identification of critical and non-critical billing errors. (Refer to [Appendix C](#))
- G. Facilitates electronic billing and re-billing as internal programs could generate new BRC detail and Counter Billing Authority (CBA) requirements.
- H. Increased accuracy of the electronic billing data can be utilized for in house and AAR analytical purposes.
- I. A vehicle for reporting and associating Component ID's and reporting repairs to the Equipment Health Management System.

### 1.1.2 Maintenance History Benefits—Data Exchange Receivers

- A. Support failure trend analysis of components among car series for design and component manufacturer problems.
- B. Support individual decision to repair or scrap car.
- C. Support decisions to plan for production line repairs versus running cars in need of repairs, but not yet in Bad Order status.

- D. Support more detailed auditing using each car's maintenance history, specifically warranted repairs, specific car type data and duplicate repairs to note exceptions.
- E. Assist financial planning related to car replacement needs, capitalization studies and new budget developments for both stores and shop organizations.
- F. Facilitates a research data bank to support technical and cost benefit studies.

### **1.1.3 Maintenance History Benefits—Industry**

- A. Early Warning (EW) and Maintenance Advisory (MA) information related to repair history by the AAR.
- B. Support AAR committee information requirements.
- C. Permit monitoring of industry performance by the AAR.
- D. Increased flexibility of retrieving data for special studies per the authorization of the AAR.
- E. Facilitates research to support technical and cost benefit studies by the AAR.
- F. Analyze failure trends of components among car series for design and component manufacturer problems by the AAR.

## **1.2 Participation in Railinc CRB Data Exchange**

Companies must submit an email request to the following email address—[csc@railinc.com](mailto:csc@railinc.com) at least **30** days in advance of their intent to join, modify, or terminate their participation in this system. Include an estimated volume count in your original notice. Participating companies must furnish the data as prescribed in this manual.

The record layout contained herein is mandatory per the AAR Office Manual Rules of Interchange, Rule 113 - Data Exchange Procedures.

Participating companies encountering any difficulties in complying with the requirements of this program should contact the [csc@railinc.com](mailto:csc@railinc.com).

### **1.2.1 Data Exchange Schedule**

The following time schedule will govern participants in the CRB Data Exchange program:

- A. The CRB Exchange data must be submitted to Railinc based on the annual schedule published by Railinc each December. The schedule will be approved by the CRB Committee prior to publication. Contact Railinc for this schedule at [csc@railinc.com](mailto:csc@railinc.com). In addition, the schedule is located on Railinc's corporate site located at <https://www.railinc.com/rportal/car-repair-billing-data-exchange>.
- B. Railinc will process per the defined annual Data Exchange schedule.

- C. Submitter will receive an email with the Inbound Data Exchange Log Report from the CRB Data Exchange. This report defines the status as well as the information only and mandatory error codes (**Appendix C**) will be electronically transmitted to all registered submitters upon inbound file processing. Participating submitters encountering any difficulties with input data should immediately contact Railinc at [csc@railinc.com](mailto:csc@railinc.com). (**Real Time status**)
- D. Receivers will receive an email with the Outbound Data Exchange Log Report and notification the file is available to download. This report defines invoices distributed by the billed party contained in the outbound file. This report is distributed monthly per the Data Exchange schedule. Participating recipients encountering any difficulties with output data should immediately contact Railinc at [csc@railinc.com](mailto:csc@railinc.com).

### **1.2.2 Participant Profile Information**

The CRB Data Exchange process is electronic therefore the following registration information is necessary:

- A. **Primary Billing/Invoicing Party or designated Agent.** Identification of the registered Billing/Invoicing Party or designated agent used to submit/receive records from the Exchange. This information is used for CRB Data Exchange profile setup.
- B. Identification of other **Billing Parties** which may be included in the data submitted for input to the Exchange.
- C. Type of submission - FTP. Specific connectivity information (hardware addresses, port information, queue names, etc.) will be provided by the Data Exchange Product Support Team during the initial setup phase. Submitters with an existing Railinc FTP mailbox must provide this information at the time of setup.
- D. The name, title, phone number, full address, and email address of the person responsible for submission of the CRB Exchange data will be kept on file. Communications will be sent to the email addresses defined by the submitter profile.

### **1.2.3 Notification of Participation or Changes**

- A. All submissions received by Railinc that contain no critical errors will be submitted to output recipients. Submitted files must be in accepted or partially accepted status as defined in the Inbound Data Exchange Report. (**Screenshot of IB Report**)
- B. Participants must submit data in accordance with the Data Exchange schedule referenced in Section [1.2.1.A.](#)

### **1.2.4 Confidentiality**

- A. No company will be permitted access to the data of another company unless a letter of authority is on file from the car mark owner or the authorized agent. (**LOA application**)
- B. Unless prior approval is obtained, AAR statistical studies will be conducted by masking specific repairing or owning organization. (**Refer to Railinc Data Security Policy**)

## 1.3 Data Submission and Receipt

Inbound (files submitted to Railinc) – All files must be in by the 3rd business day of each month.

Outbound (files sent from Railinc) – Will be processed on the 4th business day of each month.

Business Day is based on the Railinc calendar.

### 1.3.1 Data To Railinc

- A. Data submitted for the CRB Data Exchange process must conform to the format in [Appendix G](#) and must be submitted in the sequence shown in Section [1.4](#).
- B. Data submitted to Railinc via FTP must conform to the following rules.
  - The file sent to Railinc via FTP must comply with the naming convention of CRIPYYMM.txt or CRIPYYMM.dat and converted to a ZIP with the same naming convention. Submitters of files for more than one Billing/Invoicing Party must specify the Billing/Invoicing Party at the beginning of the file name (For example, CSXT\_CRIPYYMM.TXT OR CSXT\_CRIPYYMM .DAT and then ZIPPED with the same naming convention.).
  - In the case of a file resubmission within the same Data Exchange period, the file name must be the same (including case sensitivity). For example, if the initial file is CSXT\_CRIPYYMM.DAT then the resubmit Csxt\_CRIPYYMM.DAT would be result in a duplicate file being processed.
  - The file sent to Railinc via FTP must be sent to the authorized Car Repair Billing Mailboxes, setup by Railinc Product Support.
  - Each zip file must contain one and only one text file.
- C. Data received by the cut-off date, shown in the Data Exchange production schedule, will be processed for exchange in that month's cycle. This data may contain more than one account year and month depending upon the submitting parties' practices. No billing parties' data will be exchanged to billed parties in an out-of-balance condition.

---

**Important Note:** Only one file can be submitted per month to Railinc. A file contains one or more invoices to one or more Billed Parties per AAR Rule 112.

---

- D. The Billing/Invoicing Party or Billing Agent must submit invoices that correspond to the data submitted to the CRB Data Exchange process and the regular Car Repair bill (invoice) rendered to each billed company for each account year/month. Data submitted to the CRB Data Exchange process can include records for those charges for which a separate bill (invoice) is specified by the Office Manual, Rule 112.
- E. Late Data Exchange submissions will be retained by Railinc for the next Data Exchange cycle.
- F. Data for cars repaired by their owner (i.e. system repairs) may be submitted through the Data Exchange but will not be included in the Outbound File. These records will be used

only in the development of industry statistics. (**This can be changed by the individuals system profile to pass all the way through the OB**)

- G. If the file contains critical errors, Railinc will reject either the entire file or the invoice that contains the error. If Billing/Invoicing Party and or Billed Party marks are not valid or not found they will be considered critical errors and records will be rejected/excluded from inbound file. Submitting party will receive notification of records being rejected/excluded.

### 1.3.2 Data From Railinc

- A. Data from the CRB Data Exchange process will be distributed to the *Billed Party* per annual schedule published by Railinc. (Refer to Section [1.2.1.A](#)) Any unexpected delays or modifications to this schedule will be communicated via email.
- B. Data output will be furnished in the sequence shown in Section [1.4](#) and will be accompanied by the Control Reports and Invoice discussed in Section [1.5](#).
- C. Receivers will receive an email with the Outbound Data Exchange Log Report and notification the file is available to download. Receivers are responsible for downloading their respective files from the FTP mailbox within 14 days of the Data Exchange Process run as specified by the Data Exchange schedule. (Refer to Section [1.2.1.A](#))

## 1.4 Processing Controls

- A. Since the system involves not only a large volume of data, but also a considerable amount of money, CRB Committee has instituted a set of controls to ensure that all data received is completely accounted for.
- B. The detail records are summarized and compared to the Billing Participant Summary (Type 8) and the Final Total Summary (Type 9) summary records.
- C. Should it be necessary for Railinc to request a company to resubmit data at any time, the company should be prepared to resubmit for current month processing or include the data in the subsequent month's submission.
- D. AAR / Railinc will notify the industry prior to the implementation of any change to the system.

## 1.5 Control Reports and Invoices

### 1.5.1 Reports Generated by Railinc

Submitters will receive an Inbound Data Exchange Report by email once the file has been processed. The Billing Road Log for Data Distributed by Railinc is sent to submitters once the CRB Data Exchange process is complete. This report defines what information is distributed to the billed parties. The outbound Data Exchange Log Report is emailed to Receivers with invoices contained in the Outbound File accessible through the FTP mailbox.

### **1.5.2 Invoice**

A Railinc CRB Data Exchange monthly billing invoice will be forwarded to the registered recipient of the CRB Data Exchange records from Railinc.

### **1.5.3 Billing For Railinc Data Center Processing Costs**

Car Repair Billing Service Fee as listed in AAR Office Manual of Interchange Rules under Appendix E, Miscellaneous Fees for Interchange Services. You can also refer to the Car Repair Billing annual per car fee listed in Railinc's price list at <https://www.railinc.com/rportal/price-list>.

## **2 Pricing/Edit Programs – Removed**

## 3 Editing Payables

### 3.1 Scope and Purpose

The scope and purpose of this documentation is not to establish a single system within the industry but to provide basic guidelines for editing CRB and to prepare an Electronic Car History File for the use of the car owner.

Each car owner should design a system which meets their own managerial requirements within their own processing and economic limitations. Consideration should be given to:

- Use of the Car Repair Billing Procedures Manual
- Methods of capturing non Data Exchange payable data
- Method for verifying car ownership and recording maintenance activity
- Retention of all repair detail as required
- Method to include exception letters
- Incorporation of multiple owner car fleets
- Integration with other managerial data processing systems
- Scope of charges for each car or class of cars:
  - Running Repairs
  - Damages, Destroyed, Miscellaneous Charges, etc.
  - Heavy Repair Expenses
- Extent and nature of management controls
  - Budget Planning
  - Verification of Bills Prior to Payment
  - Billing Trends by Billing/Invoicing Party and/or Repairing Party
  - Volume of Exceptions Identified

### 3.2 Post-Processing

#### 3.2.1 Analysis

Reporting and analysis is left to the car owner or designated agent.

## 4 Price Master

### 4.1 Scope and Purpose

The US and Canadian Price Masters contain the costs for repairs as specified in the AAR Field Manual of the Interchange Rules. Both Price Masters are currently updated and released quarterly on January 1, April 1, July 1 and October 1 of each year. If crucial to meet industry requirements, interim Price Masters may be released. Records in both Price Masters contain the direct material price, the labor time standard for the fixed portion of the labor, the time standard for the variable portion of the labor, the labor cost for the fixed and variable portion of the labor and the credit for the material removed.

Note: There are two Price Master files distributed each quarter to recipients. The USPM.ZIP/CAPM.ZIP files include the current quarter data as well as the data from the previous three quarters. The USSHPM.ZIP/CASHPM.ZIP files are a shorter version of the Price Master file which include the current quarter data along with one previous quarter's data.

### 4.2 Direct Material Prices

The material price is developed on the basis of a quarterly price survey. The survey consists of the following freight car parts:

- Parts representing the top 90% of material billed during the previous year
- One fourth of the next 40 highest items billed during the previous year.
- Additional parts as requested by the Car Repair Billing Committee
- All Wheel sets
- All End of Car Cushioning Devices
- All air brake valve portions

For parts not surveyed in the quarter and not frozen, the prices are indexed using the AAR's Cost Recovery Index.

### 4.3 US Price Master

The US Price Master is used to edit and price bills issued between any car owner and Billing/Invoicing Party. The US Price Master is created and distributed by the AAR.

The Material Quote survey is sent primarily to the AAR Class I member railroads. The prices received are reviewed for accuracy and consistency. The price in the Price Master is the average of the valid prices received.

### 4.4 Canadian Price Master

The Canadian Price Master is used to edit and price repairs when both the car owner and the repairing party are located in Canada. The Canadian Price Master is created and distributed by AAR.

Material prices in the Canadian Price Master are the same prices in the US Price Master, with an exchange rate applied. The exchange rate, as published by The Bank of Canada, on the first business day of the prior quarter will determine the exchange rate applied to material prices for the current quarter.

## **4.5 Labor Charge**

The labor charge for each repair is the product of the labor time standard and the labor rate.

## **4.6 Labor Time Standards**

The Car Repair Billing Committee develops and maintains the labor time standard for each job code by studying the performance of the repair primarily at a railroad repair facility. The repair process is generally filmed. By reviewing the video, the repair is broken down into tasks and each task into the elements required to complete the task. The AAR's time standard development system, Modular Arrangement of Predetermined Time Standards (MODAPTS), is then used to develop and maintain a time standard that represents the steps, motions and processes required to complete the repair. The final time standard is compared to the film of the actual repair to assure the standard is complete and accurate.

## **4.7 Labor Rate**

The labor rate is a charge for each hour of labor required to complete a repair. The labor rate consists of the base hourly wage, fringe benefits and overhead rate. *See Office Manual Rule 111*

## **4.8 Material Credit**

The material credit reflects the value of the material removed during the repair. The credit may reflect the scrap value or secondhand value depending on the condition of the material removed.

## **4.9 CRB Pricing Methodology**

Calculating the Price of a repair is as follows:

$$\begin{aligned} \text{Price\_of\_Repair} &= (\text{Price\_Master\_Material\_Price} - \text{Price\_Master\_Credit\_Price}) * \\ &\text{Quantity\_of\_Repair} + (\text{Price\_Master\_Variable\_Labor\_Price} * \text{Quantity\_of\_Repair}) + \\ &\text{Price\_Master\_Fixed\_Labor\_Price} \end{aligned}$$

## 5 Railinc Internet Billing Repair System

The Railinc Internet Billing Repair System (BRC) works in partnership with the Car Repair Billing (CRB) Data Exchange System to provide each participant the opportunity to electronically accumulate individual car repair costs for accounting, auditing and analytical purposes.

To register for the BRC system, go to the Railinc Corporate site at , <http://www.railinc.com> and register by clicking the, “Need to Register? Link under the Customer Login section”.

The BRC system was designed to allow the BRC User to issue Car Repair Billing invoices in accordance with the Interchange Rules listed in the AAR Field and Office Manuals.

The system provides a standard on-line interface where users can enter, manage and invoice billing repair data. This process starts with creating billing repair data for submission to the Data Exchange. The user also has the option to submit manually priced billing repair data. Data can either be priced successfully or returned with errors. Any errors must be corrected and resubmitted before the data can be invoiced or sent for Data Exchange. A validated repair bill can be gathered with other bills for a particular car owner and consolidated into one invoice per Billed Party. For more information on the BRC application refer to Railinc's corporate site at <https://www.railinc.com/rportal/billing-repair-card>.

## Appendix A General Definitions

### A.1 Qualifier Field (Qualifiers/Car Part Codes)

Certain Applied and Removed Job Codes have a related alpha car part code or numeric qualifier field which must be reported where the AAR Interchange Rules require this coding.

The coding structure encompasses two items:

1. **Qualifiers** (Defined in AAR Field Manual Section B-Correct Repair Charts or Section E - General Information) - A 2-digit, numeric code to identify a specific manufacturer and/or model or AAR design designation within a specified Job Code. For example (from AAR Rule 21), Job Code 2436 **01** (Cardwell Westinghouse Mark R500) or Job Code 2436 **10** (Cardwell Westinghouse Mark 50).

Qualifiers always start at 01 and cannot have duplicates. However, Qualifiers may have open numbers or the item that used Qualifier 01 in a particular chart was discontinued or made obsolete and now the first item in that chart has a Qualifier greater than 01. The Price Master File contains the highest valid number for the Applied and/or Removed Job Code.

2. **Car Parts** (Car Part Nomenclature - defined in AAR Field Manual Rule 83) - A 3-character, alphabetic code to identify specific car parts for labor or securement reporting. For example; Job Code 4450 **EC** (Brake Beam Safety Support) or Job Code 4450 **QR** (Side Door).

### A.2 Job Code Field

Job Codes are unique 4-digit numbers that identify the inspection, repair, and/or testing performed, or the car component applied or removed. This code will carry a net applied price or a specific rate per some quantity of work such as hours of labor or inches of welding.

Job Codes are assigned by the AAR Car Repair Billing Committee. Job Code numbers below **1000** have been reserved for use by repairing party's *in-house* reporting programs. Job Codes 7000 and above (as found in Appendix D in the AAR Field Manual) are not AAR issued or governed by the AAR. These are listed to provide and facilitate comprehensive reporting of system and contract shop repairs to tank cars and covered hopper cars, but are not considered AAR Interchange Billing. Any Job code submitted above 6999 must use the "N" in the machine priceable indicator field. (See section A.10).

No specific range is assigned to separate major car parts but wherever the last **2** digits are **99**, this code is used to report actual material situations or other special situations. These codes should be used only when manufactured material per AAR Field Manual Rule 72 is involved or for billing related to a Damaged, Dismantled or Destroyed Unit as described in AAR Rule 111. This is also used to report wheel set transfers (Job Code 3399) per AAR Field Manual Rule 44. (See Car Repair Billing Procedures Manual Appendices Q, R and T).

## A.3 Responsibility Code Field

One character numeric code used to designate responsibility for repairs made to a car. *See AAR Field Manual Rule 83.*

Code	Responsible Party
1	Owner
2	Handling Line (H/L)
3	Defect Card or Joint Inspection Certificate Authority

## A.4 Standard Point Location Code Field (SPLC)

The Standard Point Location Code (SPLC) is the selected means of identifying all repair locations on the North American Continent for the following reasons:

- Uniformity of Interpretation
- Used in Other Data Exchange Systems
- Controlled Assignment by Each Company
- A Multi-Level Coding Structure

The coding levels are:

- A** Region
- B** State/Province
- CC** County
- DD** Location

A Repairing Party should submit their request for new coding to the AAR/Railinc Business Services Division for incorporation into the Centralized Station Master file.

---

**Important Note:** In SPLCs established for Canada and Mexico, the first digit **A** (for Region) has been defined as:

- |        |                  |
|--------|------------------|
| Canada | = <b>0</b> XXXXX |
| Mexico | = <b>9</b> XXXXX |
- 

The Data Exchange layout contains a mandatory 6 digit SPLC field and an optional 9 digit SPLC field. At a future date (to be determined by CRB Committee), the 6 digit SPLC field will be retired and our industry will be required to report SPLC in the 9 digit field.

Also refer to <http://www.nmfta.org/pages/splc.aspx>

## **A.5 Repair Facility Type Field**

The Repair Facility Type field uses a 2-character code to identify the type of facility where car repairs were performed. See AAR Field Manual Rule 83 and Appendix A Definitions for further information.

BS = Back Shop

CS = Contract Shop

ET = Expedite Track

RT = Repair Track

LR = Line of Road

## A.6 Reporting Quantity Field

Unit of Measure Code	Master Definition	Rule References	Field Reporting
1	Each or Assembly	3-8, 10–13, 16–22, 36–37, 41, 43–44, 46–48, 50, 53, 57–59, 61–66, 68, 71, 72, 74–75, 77, 79–81	Whole Number
2	Weight in Pounds	60, 68, 69, 76, 82	Drop less than 1/2 lb., Add 1 if 1/2 lb. or over
3	Length in Feet	4, 5, 11, 53, 73, 81	Drop less than 6 in. Add 1 ft. if 6 in. or over
	Length in Inches	82	Whole Number
4	Hours of Labor	68, 75	Exact 1/10 of hour
5	Weight (in Cubic Weight)	n/a	n/a
6	Square Feet	78, 80	Drop less than 1/2 sq. ft., Add 1 if 1/2 sq. ft. or over
7	Quarts	68	Add 1 for any fraction of a quart
8	Board Feet	78	Drop less than 1/2 bd. ft., Add 1 if 1/2 bd. ft. or over
9	Per 1000 Gallons	81	On fractions, drop if less than 500 gal. Add 1 if 500 gal. or over
0	Gallon/Other	13, 16–21, 36, 59, 68, 74, 75	If reporting gallon add 1 for any fraction of a gallon

## A.7 Reporting Description Field

Rule 41 requires the reporting of numeric information for wheel plates with respect to gauge readings and manufacture dates (XX is allowed when manufacturer date is unknown on removed wheel only). Numeric data is to be shown in the *Description* field. Rule 41 also requires the reporting of alpha Wheel Manufacturer and Wheel Class Identification data. This data is also to be shown in the *Description* field.

Whenever undefined Car Part Codes ZA through ZH are reported in the Qualifier field per AAR Field Manual Rule 83, a **narrative description** to properly identify a part must be used. (Note - This description must not simply be the same as shown in the Car Part Code Description for ZA through ZH. It must specifically identify the part and it is limited to 50 characters).

Per AAR Field Manual Rule 72 (99 Job Codes), a **narrative description** is required to properly identify a part. If Car Part Codes ZA through ZH are used with a XX99 Job Code, this description must not simply be the same as shown in the Car Part Code Description for ZA through ZH. It must specifically identify the part and it is limited to 50 characters.

## **A.8 Rule 72 Manufactured Material (XX99 Job Codes)**

Miscellaneous material is reported by a Job Code ending in 99 per AAR Field Manual Rule 72. Car Part Codes per the AAR Field Manual, Rule 83 must be used in conjunction with the XX99 Job Codes.

The code structure is:

- 1999** Air Brake Parts, Accessories and Brake Details other than Air Brakes
- 2999** Couplers, Coupler Yokes, Draft Gears and associated details
- 3399** Wheel Set Transfers (only to be used to report a wheel set transfer described in AAR Field Manual Rules 36 and 44. This XX99 Job Code does not require the use of a Car Part Code).
- 3999** Truck Details
- 4099** Superstructure, including Car Body, Underframe, Doors, Ends, Floors, Roofs and their Accessories
- 4599** Special Equipment includes Mechanical Refrigeration, Auto Loading, and TOFC Equipment.
- 4999** General Miscellaneous
- 5999** Material supplied by car owner. Also used for freight on material supplied by car owner with condition code 0. To be used only by car owner when furnishing material. See Office Manual Rule 111.
- 6999** To be used only when there is no specific job code for a component that requires the reporting of an AAR Component ID. Report applicable Car part identification code as noted in the specific rules where the use of this job code is permitted. Report applicable location when required.

## **A.9 Priceable Repair (Machine Priceable)**

For a repair to be priced using the AAR Price Master you must use valid couplets (i.e., Applied/Removed Job Codes, Why Made Codes, Condition Codes, Responsibility Codes) and specify "Y" in Machine Priceable indicator field.

## **A.10 Non Priceable Repair (Manually Priceable)**

To enter a manually priced repair on a valid Job Code (overriding the AAR Pricing) you must specify "N" in Machine Priceable indicator field. All 99 Job Codes must be manually priced.

## **A.11 Wrong Repair**

Whenever an improper or non-permissible repair is made and reported through an invalid Applied/Removed Job Code couplet, this must be indicated by placing a 'Y' in the 'Wrong Repair Indicator' field. Leaving this field blank or by placing an 'N' indicates correct repairs.

When the wrong repair indicator is set to "Y", charge will be priced at zero for Applied/Removed Job Code couplet. It is the responsibility of the Car Mark Owner and Car Mark Agent to follow OM Rule 111 10.C. regarding further handling of a wrong repair situation.

## A.12 Customer Identification File (CIF)

The Customer Identification File (CIF) is an electronic reference file developed for the freight transportation industry. The CIF contains the name, physical and mailing addresses, corporate parent identification and a unique identification code for each location of a transportation carrier customer. The identification code is used in exchanges of shipment information.

With CIF, carriers can locate unique customer identification codes; get up-to-date customer information such as legal and doing-business-as names; find physical and mailing addresses; locate corporate parent identification and other hierarchical data; and access unique identification codes for location and sub-location records.

Currently all CIF-related field information is optional to report in CRB.

CIF is now available on the Web. The CIF URL is <https://cif.railinc.com>.

## A.13 Proper Usage of Detail Source Codes

- BR** Billing Repair Data—Used when detail record of repairs are prepared by all signatory's or agents thereof in accordance with AAR Rule 83.
- CB** Counter Billing Authority—Used when billing for authorization of exceptions, data positions 33-47 Document Reference Number) must be populated with authorization document number issued by authorization party.
- DC** Defect Card—Used when repairs (responsibility 3) are performed on authority of an issued Defect Card only.
- DE** Destroyed Equipment [Rule 107]—Used only for when unit is badly damaged or destroyed per Rule 107 guidelines.
- DM** Dismantled Equipment [Rule 108]—Used only for equipment/units requiring extensive repairs per Rule 108.
- DR** Defect Card Rebuttal Billing—Used when Car Mark Owner re-bills Defect Card repairs (responsibility 3) made by an intermediate railroad, of which the electronic data has previously passed through data exchange.
- GB** Group Billable—Used when repairs are performed by all signatory's or agents thereof in accordance with AAR Office Manual Rule 112.
- GT** Canadian Goods and Services Tax—Used only for repairs performed for car marks that are registered and resident in Canada.
- HT** Canadian Harmonized Tax—Used only for repairs performed on car marks that are registered and resident in the Canadian Maritimes.
- IV** Imposed Value Added Mexican Tax—Used only for repairs performed and billed between Mexican RR in Mexico.
- JD** Joint Inspection/Defect Card Billing for Retired/Dismantled Unit—JIC or Defect Card billing for a retired/dismantled unit not actually repaired (Rule 102).
- JI** Joint Inspection—Used when repairs (responsibility 3) are performed on authority of an endorsed JIC only.

- JR** Joint Inspection Rebuttal Billing—Used when Car Mark Owner re-bills JIC repairs (responsibility 3) made by a third party repair facility, of which the electronic data has previously passed through data exchange.
- MA** Material Supplied [Rule 85]—Used for Car Mark Owner to bill railroad for material shipped per Rule 85.
- OT** Other—Used only when no other valid Detail Source applies. Billing Party must contact Billed Party prior to submitting this detail source through data exchange
- PT** Canadian Provincial Sales Tax—Used only for repairs performed on car marks that are registered and resident in Canada.
- QT** Quebec Sales Tax—Used only for repairs performed on car marks that are registered and resident in Quebec, Canada.
- RE** Rebuttal Billing—Used to re-bill (responsibility 1) repairs to a Maintenance Responsible Party, of which the electronic data has previously passed through data exchange.
- SH** Shop Billing—Used when the repair facility is one of the following:
- Contract Shop - A repair facility designated by car owner to perform repairs to interchange freight cars. Any repairs performed by a subscriber to the interchange agreement of the Association of American Railroads, including any repairs performed on the subscriber's behalf by a contract shop, must be done in compliance with AAR Interchange Rules and applicable governmental regulations.
  - Back Shop - A railroad's repair facility(s) for performing heavy repairs or wreck repairs (sometimes referred to as heavy shop or system maintenance facility).

## A.14 Location Codes

**Valid single unit location values are:**

A, B, C, R, L, 1, 2, 3, 4, 5, 6, 7, 8, AR, AL, BR, BL, R1, R2, R3, R4, R5, R6, R7, R8, L1, L2, L3, L4, L5, L6, L7, L8 and spaces.

**Valid Articulated location values are:**

A, B, C, D, E, F, X, Y, Z, R, L, 1, 2, 3, 4, 5, 6, 7, 8, 9, AR, BR, CR, DR, ER, FR, AL, BL, CL, DL, EL, FL, R1, R2, R3, R4, R5, R6, R7, R8, R9, L1, L2, L3, L4, L5, L6, L7, L8, L9, RX, RY, RZ, LX, LY, LZ and spaces.

**Valid Drawbar location values are:**

A, B, C, D, E, F, G, H, I, J, L, P, Q, R, S, T, U, V, W, X, Y, Z, 1, 2, 3, 4, 5, 6, 7, 8, 9, AR, BR, CR, DR, ER, FR, GR, HR, IR, JR, AL, BL, CL, DL, EL, FL, GL, HL, IL, JL, R1, R2, R3, R4, R5, R6, R7, R8, R9, L1, L2, L3, L4, L5, L6, L7, L8, L9, RP, RQ, RR, RS, RT, RU, RV, RW, RX, RY, RZ, LP, LQ, LR, LS, LT, LU, LV, LW, LX, LY, LZ, CD, EF, GH, IJ and spaces.

## A.15 Location Mapping To Price Master File

Location mapping is used when programming using the Price Master file. There are different mappings for single unit, articulated and drawbar car types.

**Use for Single Unit Car Types:**

Repair Location Value	Price Master Position
'A '	1
' A'	1
'B '	2
' B'	2
'C '	3
' C'	3
'R '	4
' R'	4
'L '	5
' L'	5
'1 '	6
' 1'	6
'2 '	6
' 2'	6
'3 '	6
' 3'	6

Repair Location Value	Price Master Position
' 4 '	6
' 4'	6
' 5 '	6
' 5'	6
' 6 '	6
' 6'	6
' 7 '	6
' 7'	6
' 8 '	6
' 8'	6
'AR'	7
'AL'	7
'BR'	7
'BL'	7
'R1'	8
'R2'	8

Repair Location Value	Price Master Position
'R3'	8
'R4'	8
'R5'	8
'R6'	8
'R7'	8
'R8'	8
'L1'	8
'L2'	8
'L3'	8
'L4'	8
'L5'	8
'L6'	8
'L7'	8
'L8'	8
Blanks	10

**Use for Articulated Car Types:**

Repair Location Value	Price Master Position
'A'	1
' A'	1
'B'	1
' B'	1
'C'	2
' C'	2
'D'	2
' D'	2
'E'	2
' E'	2
'F'	3
' F'	3
'X'	4
' X'	4
'Y'	4
' Y'	4
'Z'	4
' Z'	4
'R'	5
' R'	5
'L'	5
' L'	5
'1'	6
' 1'	6
'2'	6
' 2'	6

Repair Location Value	Price Master Position
'3'	6
' 3'	6
'4'	6
' 4'	6
'5'	6
' 5'	6
'6'	6
' 6'	6
'7'	6
' 7'	6
'8'	6
' 8'	6
'9'	6
' 9'	6

'T'	4			'L3'	9	'IJ'	10
' T'	4			'L4'	9		

## A.16 Definition of Rebuttal for the Purpose of this Document

Car Repair Data which has initially passed through data exchange under Detail Source Codes: BR, DC, GB, JI and then rebilled to a third party. No other Detail Sources Codes shall be rebuttaled. The rebuttal billing would use Detail Source Codes DR, JR, or RE based on the types of repairs that are rebuttal billed.

## A.17 AAR Component ID

**AAR Component ID** – The crux of the AAR component tracking processes is the standard AAR Component ID. The AAR Component ID is found on the AAR standard bar code and is used as the primary identifier in all industry databases. It is used to track critical components, as defined by the AAR. The AAR Component ID consists of a 4-character (or 4 byte) Company code and a 10-digit (or 10 byte) number. Combined, these unique 14 bytes are the standard AAR Component ID (for example: ABCD1234567890).

All wheel sets, couplers, side frames and bolsters should have on them at least one AAR standard bar code label with the AAR Component ID (both encoded and in human readable form). It is intended that this methodology will be duplicated for all tracked critical components in the AAR realm.

## A.18 Billing Repair Card

**Line Number** – Must be unique within a Billing Repair Card. **Billing Repair Card** Data Exchange requirements are defined as the unique combination of Billing Party/Billed Party/Car Initial/Car Number/Repair Date/SPLC. Line numbers that are repeated within a Billing Repair Card are not allowed. Tax codes and Detail Sources CB, DE, and DM are excluded.

### Unique Billing Repair Card Examples

Billing Repair Card							
Record Format	Billing Party	Billed Party	Car Initial	Car Number	Repair Date	SPLC	Line Number
1	XXXX	YYYY	RAIL	00001234	7/9/2018	411657000	1

## Appendix B    FTP Inbound / Outbound Files

### B.1    Inbound/Outbound Files

Data Exchange and Price Master participants must utilize a FTP mailbox to send or receive Car Repair Billing and/or Price Master files. Railinc will set up and designate an FTP (File Transfer Protocol) mailbox for every participating (Data Exchange and/or Price Master) company's Car Repair Billing profile. The Data Exchange participant must send/receive the monthly invoices to/from the designated mailboxes in accordance with the Data Exchange production schedule. Similarly, the Price Master recipient receives the Price Master file from the same mailbox.

### B.2    FTP

The Inbound/Outbound files are accessible via FTP. The participants must use their defined FTP mailbox to upload/download Car Repair Billing (CRB) Data Exchange and/or Price Master files. Railinc will provide a sample FTP script to upload or download files automatically to/from the designated mailboxes.

The CRB Data Exchange participants are encouraged to use Railinc's test environment to test their inbound files. Railinc required new participants to send two files for Railinc to upload in the test environment. The Inbound Status Report will be provided to new participants for corrections. To schedule testing, the participant should contact Railinc's Customer Success Center.

The contact at Railinc will be:

Railinc Customer Success Center  
Railinc  
7001 Weston Parkway, Suite 200  
Cary, North Carolina 27513  
[csc@railinc.com](mailto:csc@railinc.com)

## Appendix C Edit Charts

### C.1 Edit Chart 1—Data Exchange—Removed

Refer to [Car Repair Billing Data Exchange Error Codes](#).

Please use the following procedure if you need to access these Error Codes:

1. Visit [www.railinc.com](http://www.railinc.com).
2. Go to the Product Services page.
3. Under Industry Products, select Car Repair Billing.
4. Select Car Repair Billing Data Exchange.
5. Under Related Links, select Car Repair Billing Data Exchange Error Codes.

### C.2 Edit Chart 2—Removed

### C.3 Edit Chart 3—Data Exchange

CRB Data Exchange Edits Comparison Chart—Record Format 1					
Global Edit:		All "Alphabetic" and "Alphanumeric" codes MUST be Left-Justified. All "Numeric" fields MUST be Right-Justified. "Alphanumeric" fields may include special characters unless otherwise specified. "Must be Present" must be greater than spaces.			
(Sorted in position order)				Jan 2020 – Jun 2020	Jul 2020 – Dec 2020
Item	Positions	Edit	Error Code	DX Error Type	DX Error Type
1	1	<b>Record Format</b> —Must be '1'.	1A	Mandatory Reject	Mandatory Reject
2	2–5	<b>Billing/Invoicing Party Initial</b> —Must be present and alphanumeric. This should be a Railinc registered identifier of the Billing/Invoicing Party.	1B	Mandatory Reject	Mandatory Reject

## Appendix E Intentionally Left Blank

## Appendix F Price Master Maintenance

### F.1 Scope and Purpose

The following is a description of the fields and codes contained in the Price Master layout.

- **Currency Indicator**—Position 1; 1-character alpha; U = US or C = Canadian.
- **Applied Job Code**—Positions 2–5; 4-digit, numeric; Interchange Rule Job Code.
- **Applied Condition Code**—Position 6; 1-digit, alphanumeric; condition of material applied or labor performed per the Field Manual, Rule 83.
- **Removed Job Code**—Positions 7–10; 4-digit, numeric Interchange Rule Job Code.

- **Valid Why Made Code**—Positions 11–12; 2-character alphanumeric codes for Why Made Code per the Field Manual, Rule 83.
- **Valid Responsibility Code**—Position 13; 1-digit, numeric for Responsibility Code per the Field Manual, Rule 83.
- **Price Master Year**—Position 14–15; 2-digit, numeric for valid Price Master year.
- **Price Master Month**—Position 16–17; 2-digit, numeric for valid Price Master month.
- **Applied Qualifier**—Positions 18–19; 2-character, alphanumeric highest related Qualifier or Car Part for Applied Job Code (if applicable); no skips in Qualifier Codes; low range is 00 or AA.
- **Removed Qualifier**—Positions 20–21; 2-character, alphanumeric. If Machine Priceable="Y", must be blank, alphabetic or numeric-alphanumeric is invalid. The input value must adhere to one of the following:
  - If Price Master Qualifier is numeric, may not exceed highest numeric qualifier applicable to the Job Code.
  - If Price Master Qualifier = "VZ", must be a valid Car Part Code per Rule 83 in the Field Manual.
  - If first character of qualifier="Z", no edit.

(Note: If Price Master qualifier = '00', no Price Master edit)
- **Valid Locations**—Positions 22–31; 10, 2-character, alphanumeric; indicates acceptable locations as reported per the Field Manual, Rule 83.
- **Maximum Units**—Positions 32–35; 4-digit, numeric; maximum units that will be acceptable for the condition.
- **Valid Articulated Locations**—Positions 36–45; 10, 2-character alphanumeric; indicates acceptable locations as reported per the Field Manual, Rule 83.
- **Articulated Maximum Units**—Positions 46–49; 4-digit, numeric; maximum units that will be acceptable for the condition.
- **Valid Drawbar Locations**—Positions 50–59; 10, 2-character, alphanumeric; indicates acceptable locations as reported per the Field Manual, Rule 83.
- **Drawbar Maximum Units**—Positions 60–63; 4-digit, numeric; maximum units that will be acceptable for the condition.
- **Material Unit**—Position 64; 1-digit, numeric; Unit of Measure Code; valid values are:
 

1	Each or Assembly
2	Weight in Pounds
3	Length in Feet
4	Hours of Labor (Expressed in Tenths)
5	(n/a – Reserved for future use)
6	Square Feet
7	Quarts
8	Board Feet
9	Per 1,000 Gallons
0	Gallon/Other
- **Betterment Indicator**—Position 65–65; 1-digit, numeric; valid values are:
 

0	No Betterment
1	A Betterment Situation

- **Fixed Labor Standard**—Positions 66–71; 6-digit, numeric; hours and thousandths.
- **Variable Labor Standard**—Positions 72–77; 6-digit, numeric; hours and thousandths.
- **Narrative**—Positions 78–127; 50-character, alphanumeric; narrative to describe repair or service operation; should agree with Field Manual description; in some cases, may be abbreviated. For wheel, this field is redefined as follows.
  - **Wheel Narrative**—Positions 78–105; 28-character; alphanumeric; wheel description.
  - **Filler**—Positions 106–123; 18-digit, numeric; always blank.
  - **Maximum Service Metal**—Positions 124–127; 4-digit numeric; Maximum Service Metal allowable for Applied Wheel (16ths). This field is redefined as follows.
    - **Applied Service Metal**—Positions 124–125; 2-digit, numeric; Maximum Service Metal (16ths) allowable for Applied Wheel.
    - **Removed Service Metal**—Positions 126–127; 2-digit, numeric; Maximum Service Metal (16ths) allowable for Removed Wheel.
- **Material Price**—Positions 128–133; 6-digit, numeric, 2 decimals implied, (ex. 400 = 4.00); mandatory for manually priced BRCs.
- **Credit Price**—Positions 134–139; 6-digit, numeric, 2 decimals implied, (ex. 400 = 4.00); for material removed.
- **Labor Fixed**—Positions 140–145; 6-digit, numeric, 2 decimals implied, (ex. 400 = 4.00); full value of material applied for condition.
- **Labor Variable**—Positions 146–151; 6-digit, numeric, 2 decimals implied, (ex. 400 = 4.00); full value of material removed.
- **Machine Priceable**—Position 152–152; 1-character, alpha; indicators are: Y = Repair is priceable per the Price Master, N = the repair is not priceable per the Price Master.
- **Major Part Type**—Position 153–153; 1-character, alpha
 

A	Air Brake
E	EOC or COC (Cushion Units)
H	Wheel Set
R	Roller Bearing
S	Standard
T	TTX
W	Wheel
L	Labor
9	'99' Job Code (future use)
- **PM Number Prefix**—Positions 154–155; 2-character, alphabetic.
- **PM Number**—Positions 156–157; 2digit, numeric; ICC Repair Account.
- **Last Valid Year**—Positions 158–159; 2-digit, numeric; termination date for repairs to be accomplished for pricing by this record; field will contain 99 for current pricing period.
- **Last Valid Month**—Positions 160–161; 2-digit, numeric; termination date for repairs to be accomplished for pricing by this record; field will contain 99 for current pricing period.
- **Component ID Indicator** – Position 162; 1-character alpha; indicators are: Y = component ID is required, N = component ID is not required.
- **Filler**—Positions 163–250; 88-character always blank; potential user field.

## F.2 Pricing Example

All examples will use the standard pricing formula of:

$$((\text{Material} - \text{Credit}) * \text{Quantity}) + ((\text{Variable Labor} * \text{Quantity}) + \text{Fixed Labor}) = \text{Total Price}$$

### F.2.1 Standard Pricing with Fixed Labor

Fixed labor means that the amount charged for labor is “fixed” for a job code at one rate regardless of the quantity of material applied.

**Example:** Job Code 3582—Friction Casting—Ride Control Truck—Fixed Labor—Quantity of One (1) Applied

- Applied Job Code is 3582
- Removed Job Code is 3582 (used to calculate scrap credit)
- Job Code 3582 contains part number 4244 at a weight of 5 pounds
- Why Made Code = 02 (“Broken”)
- Unit of Measure = Each
- Quantity = 2
- Material cost for New condition = \$33.26
- Scrap Credit = .07 per pound (of part 4244) = 5 pounds \* .07 = \$0.35
- Labor (Fixed) = 1.555 hours at a rate of \$83.03 (per part 4450) = \$129.11

Gives us a calculation of:

$$((\$33.26 - \$0.35)*2) + ((0.00*2) + \$129.11) = \$194.93$$

**Price Master Record for this example (Job Code 3582)**

Price Master Field Name	Sample Value
Currency Indicator	U
Applied Job Code	3582
Applied Condition Code	1 ('New')
Removed Job Code	3582
Why Made Code	02 ('Broken')

## F.2.2 Standard Pricing with Variable Labor

This term is the pricing used for most Job Codes. Variable labor means that the amount charged for labor is “variable” and is based on the quantity of material applied for the Job Code. The labor, as well as the material, is multiplied by the quantity.

**Example:** Job Code 1852—Brake Shoe Key

- Applied Job Code is 1852
- Removed Job Code is 1852
- Why Made Code 02 (“Broken”)
- Unit of Measure = Each
- Quantity = 4
- Material cost for New condition = \$1.61
- Scrap Credit = \$0.00
- Labor = .093 hours at a rate of \$83.03 (per part 4450) = \$7.72 per unit

Gives us a calculation of:

$$((\$1.61 - \$0.00)*4) + ((7.72*4) + 0) = \$37.32$$

**Price Master Record for this example (Job Code 1852)**

Price Master Field Name	Sample Value
Currency Indicator	U
Applied Job Code	1852

Price Master Field Name	Sample Value
Applied Condition Code	1 ('New')
Removed Job Code	1852

### F.2.3 Standard Pricing with Fixed and Variable Labor

For Job Codes using fixed and variable labor, a portion of the labor is variable labor and a portion of the labor is fixed labor.

**Example:** Job Code 5500—Reflective Sheeting, Initial Application or Complete Renewal

- Applied Job Code is 5500
- Removed Job Code is 5500
- Why made code 27 ("Initial Application")
- Unit of Measure = Each
- Quantity = 18
- Material cost for New condition = \$1.51
- Scrap Credit = \$0.00

- Labor (Fixed)= .095 hours at a rate of \$83.03 (per part 4450) = \$7.89
- Labor (Variable)= .044 hours at a rate of \$83.03 (per part 4450) = \$3.65 per unit

Gives us a calculation of:

$$((\$1.51 - \$0.00)*18) + ((3.65*18) + \$7.89) = \$100.77$$

#### **Price Master Record for this example (Job Code 5500)**

Price Master Field Name	Sample Value
Currency Indicator	U

## F.2.4 RR&R—Remove, Repair, and Replace

This is the removal, repair, and replacement of the same part. This is identified by the use of Condition Code 8. The cost of the material will include the securement to replace the part.

**Example:** Job Code 4580—Hand Hold or Grab Iron 36 in. or less

- Applied Job Code is 4580
- Removed Job Code is 4580
- Why Made code 05 ("Bent")
- Unit of Measure = Each
- Quantity = 1
- Material cost for condition 8 (RR&R) = \$4.04 (securement)
- Scrap Credit = \$0.35
- Labor = .186 hours at a rate of \$83.03 (per part 4450) = \$15.44

Gives us a calculation of:

$$((\$4.04 - \$0.35)*1) + ((\$15.44*1) + \$0) = \$19.13$$

### Price Master Record for this example (Job Code 4580)

Price Master Field Name	Sample Value
Currency Indicator	U
Applied Job Code	4580
Applied Condition Code	8 ('RR&R')
Removed Job Code	4580

## F.2.5 R&R—Remove and Replace

This is the removal and replacement of the same part. This is identified by the use of Condition Code 9. The cost of the material will include the securement to replace the part.

**Example:** Job Code 4474—R&R Coupler Body E Type

- Applied Job Code is 4474
- Removed Job Code is 4474
- Why made code 09 (“Account Repairs”)
- Unit of Measure = n/a
- Quantity = 1
- Material cost for condition 9 (R&R) = \$0.14 (securement)
- Scrap Credit = \$0.00
- Labor = .565 hours at a rate of \$83.03 (per part 4450) = \$46.91

Gives us a calculation of:

$$((\$0.14 - \$0.00)*1) + ((46.91*1) + 0.00) = \$47.05$$

### Price Master Record for this example (Job Code 4474)

Price Master Field Name	Sample Value

## F.2.6 Pricing using Why Made Code

The new CRB system will allow for different pricing formulas based on the Why Made Code. This example will build on the example for **Standard Pricing with Fixed Labor** (Job Code 2038), but use a different Why Made Code. In this example, a Why Made Code of 03 ("Missing") with Responsibility Code 3 (Defect Card authority) would change the pricing because there is no credit for scrap.

**Example:** Job Code 2038—Coupler Body, SBE 67 CC

- Applied Job Code is 2038
- Removed Job Code is 2038 (used to calculate scrap credit)
- Responsibility Code 3 (Defect Card authority)
- Job Code 2038 contains part number 2047 at a weight of 384 pounds
- Why Made Code = 03 ("Missing")
- Unit of Measure = Each
- Quantity = 1
- Material cost for New condition = \$352.49
- Scrap Credit = \$0.00
- Labor = 1.076 hours at a rate of \$83.03 (per part 4450) = \$89.34

Gives us a calculation of:

$$((\$352.49 - \$0.00)*1) + ((89.34*1) + 0.00) = \$441.83$$

### Price Master Record for this example (Job Code 2038)

Price Master Field Name	Sample Value
Currency Indicator	U
Applied Job Code	2038
Applied Condition Code	1 ('New')
Removed Job Code	2038
Why Made Code	03 ('Missing')
Responsibility Code	3
Year	05
Month	10
Applied Qualifier	01 ('American Steel Foundries')

Price Master Field Name	Sample Value

### F.2.7 Weld—Labor Only Job Code

The welding Job Codes 4800 to 4812 contain variable labor and no material. Variable labor means that the amount charged for labor is “variable” and is based on the quantity of material applied for the Job Code. The labor, as well as the material, is multiplied by the quantity.

**Example:** Job Code 4800 - Tack or Fillet Weld

- Applied Job Code is 4800
- Removed Job Code is 4800
- Responsibility Code 1 (Owner)
- Why Made Code = 02 (“Broken”)
- Unit of Measure = Length (Per Inch)
- Quantity = 12
- Material cost for New condition = \$0.00
- Scrap Credit = \$0.00
- Labor (Variable) = 0.040 hours at a rate of \$83.03 (per part 4450) = \$3.32

Gives us a calculation of:

$$((\$0.00 - \$0.00)*12) + ((\$3.32*12) + 0.00) = \$39.84$$

**Price Master Record for this example (Job Code 4800)**

Price Master Field Name	Sample Value

## G.2 Clarification on Data Exchange Record Formats 1, 6, 8 and 9

### G.2.1 Record Format 1

#### Clarification on Data Exchange Record Format 1—Repair Charges

The Record Format 1 will be submitted according to the combination of Billing/Invoicing Party, Billed Party, Invoice Number, Detail Source, Car Initial, Car Number, Repair Date and SPLC.

#### Data Exchange Record Format 1 Example:

Canadian Billing Party XXXX repairs Car Owner YYYY cars and submits an invoice in with the Account Date 0802, Invoice Number 654321 with 10 BRC's with Detail Source "BR" that total \$2000.00. Also included is CBA Detail Source "CB" for \$100.00 (car owner Issued Railroad CBA file number 12345), with 5 Detail Source "GB" totaling \$1000.00 and Detail Source "GT" for \$900.00 (Detail source GT would only have been included on Canadian registered entity).

#### Record Format = 1 (Per the example above, report 9 more times for each BRC Detail line "BR")

- Record Format = 1
- Billing/Invoicing Party = XXXX
- Billed Party = YYYY
- Account Date (YYMM) = 0802
- Invoice Number = 654321
- Price Master Currency Indicator = C
- Detail Source = BR (Billing repair data)
- Car Initial = YYYY
- Car Number = 000500
- Kind of Car Symbol = T
- Load/Empty Indicator = E
- Repair Date (YYMMDD) = 080202
- SPLC = 030191
- Repairing Party = XXXX
- Repairing Party Invoice Number = 654321
- Repair Facility Type = RT (optional)
- Location on Car = A
- Quantity = 0010
- Condition Code = 0
- Applied Job Code = 4450
- Applied Qualifier = AQ
- Why Made Code = 05
- Removed Job Code = 4450
- Removed Qualifier = AQ
- Responsibility Code = 1
- Labor Charge = 0009468
- Material Charge = 00000000
- Material Sign = D
- Machine Priceable Indicator = Y
- Narrative = LABOR, FREIGHT CAR
- Line Number = 00001
- Railinc Inbound Date Stamp (Input by Railinc) =
- Railinc Outbound Date Stamp (Input by Railinc) =

Record Format = 1 (Per the example above, report 1 time for each CBA file number.)

Record Format = 1  
Billing/Invoicing Party = XXXX

---

## G.2.2 Record Format 6

### Clarification on Data Exchange Record Format 6 - Contact Information

Record Format 6 records (Contact Information) must be reported for each of the five contact types: Remit To (RT), Inquires (IQ), Exceptions (EX), Billing/Invoicing Party (IP) and Billed Party (BP).

#### Definition of contact types for type six records:

RT: "Remit To" The Billing/Invoicing Party contact who is responsible for processing an invoice remittance payment received from the Billed Party.

IQ: "Inquiries" The Billing/Invoicing Party contact to inquire on the status of payments, issues, questions, other than exceptions received from the Billed Party.

EX: "Invoice Exceptions" The Billing/Invoicing Party contact who is responsible for addressing and replying to all invoice related exceptions taken by the Billed Party per AAR Rule 112.

IP: "Billing or Invoicing Party" The contact who is responsible for submitting the invoice to the Billed Party for payment.

BP: "Billed Party" The contact to whom the Billing/Invoicing Party has directed the invoice for payment.

RTUSA: "Remit To USA" The Billing/Invoicing Party contact in the United States who is responsible for processing an invoice remittance payment received from the Billed Party.

RTMEX: "Remit To Mexico" The Billing/Invoicing Party contact in Mexico who is responsible for processing an invoice remittance payment received from the Billed Party.

RTCAN" "Remit To Canada" The Billing/Invoicing Party contact in the United States who is responsible for processing an invoice remittance payment received from the Billed Party.

### Data Exchange Record Format 6 Examples:

Record Format = 6

Billing/Invoicing Party = XXXX

Billed Party = YYYY

Account Date = 0801

Invoice Number = 123456

Price Master Currency Indicator = C (C for Canadian or U for US)

Contact Type = RT (Remit To Contact)

Company Name = XXXX Railway Company

Name = Sam Smith (optional field)

Title = Manager

Phone = 919-651-5000

Fax = 919-651-5400

Email = [Sam.Smith@XXXX.com](mailto:Sam.Smith@XXXX.com)

Street Address 1: = 123 Main Street

Address 2 = Suite 200 (optional field)

Address 3 = (optional field)

Address 4 = (optional field)

City = Montreal

State/Province = PQ

Country Code = CA

Zip/Postal Code = H3B 4M4

Record Format = 6  
Billing/Invoicing Party = XXXX  
Billed Party = YYYY  
Account Date = 0801  
Invoice Number = 123456  
Price Master Currency Indicator = C (C for Canadian or U for US)  
Contact Type = **IQ** (Inquiries)  
Company Name = XXXX Railway Company  
Name = Phil Jones (optional field)  
Title = Supervisor  
Phone = 919-651-5001

Address 2 = Floor 12 (optional field)  
Address 3 = (optional field)  
Address 4 = (optional field)  
City = Washington  
State/Province = DC  
Country Code = US  
Zip/Postal Code = 20009

---

**Important Note:** See the Record Format 6 ([Appendix G](#)) for the Required and Optional fields to report. **Required fields must be reported.**

---

### G.2.3 Record Format 8

#### Clarification on Data Exchange Record Format 8—Invoice Subtotal/Total Format

The Record Format 8 (Billing/Invoicing Party total) will be reported as the total invoice amount. In addition, the format will be used to report sub totals on the invoice by Detail Source (group billing, rebuttal, defect card, etc.).

Record Format 8 with Detail Source “ZZ” is for the summary of the invoice total only as per AAR Office Manual Rule 112. It represents the invoice total charge including any discounts, taxes, etc. This is the amount presented to the Billed Party for payment to the Billing/Invoicing Party. It must contain the count of the number of Format 1 records, the sum of the labor, and the sum of the material for the invoice. The Tax Payer ID field must be filled in along with the invoice date. The Format 8 Detail Source ZZ record is the combined total of the preceding Record Format 8 sub-total records.

One Record Format 8 sub-total record must be created for each Detail Source present in the invoice file. It must contain the count of Format 1 records, the sum of the labor, and the sum of the material for its corresponding detail source records.

---

**Important Note:** There must be a Record Format 8 sub-total record for each corresponding Record Format 1 Detail Source code reported. A corresponding Record Format 8 invoice total record must be created using Detail Source ZZ.

---

The Tax Payer ID field is required on all “8ZZ” invoice total records and the appropriate Tax Payer ID is required on any Format 8 sub-total record associated with a tax (GST, PST, QST, IVA, HST, state, etc).

Required on invoice total ("ZZ") for US, Canadian and Mexican transactions.

- Federal US Tax Payer ID required for all US submitters.
- Canadian Tax Payer Registration Number required for all Canadian submitters (GT, HT, QT and PT).
- Mexican Tax Payer Id required for all Mexican submitters (IV).

---

**Important Note:** Reference the Record Format 8 ([Appendix G](#)) for the Required, Conditionally Required and Optional fields to report. **Required fields must be reported.**

---

#### Data Exchange Record Format 8—Example 1:

Canadian Billing Party XXXX repairs Canadian Car Owner YYYY cars and submits an invoice in with the Account Date 0801, Invoice Number 123456 with 10 BRC's with Detail Source “BR” that total \$2000.00. Also included is CBA Detail Source “CB” for \$100.00, Multiple Detail Source “GB” totaling \$1000.00 and Detail Source “GT” for \$900.00 (Detail source GT would only have been included on Canadian registered entity). This billing would also require an “8ZZ” record totaling \$4000.00

Record Format 8 for the above example is illustrated below as required fields:

Record Format = 8 (for Detail Source BR)  
Billing/Invoicing Party = XXXX  
Billed Party = YYYY  
Account Date = 0801  
Invoice Number = 123456  
Price Master Currency Indicator = C  
Detail Source = **BR** (Billing Repair Data)  
Record Count = 50 (Total number of reported “BR” Record Format 1 detail lines)  
Labor Charge = 0000150000  
Material Charge = 0000000000050000  
Material Sign = D  
Invoice Date = 080101  
Tax Payer ID = XX-651-5042 (could be left blank except for reporting Detail Source GST, PST, QST, IVA, HST, state, etc)  
Railinc Inbound Date Stamp (Railinc use only)  
Railinc Outbound Date Stamp (Railinc use only)

Record Format = 8 (for Detail Source CB)  
Billing/Invoicing Party = XXXX  
Billed Party = YYYY  
Account Date = 0801  
Invoice Number = 123456  
Price Master Currency Indicator = C  
Detail Source = **CB** (Counter Billing)  
Record Count = 1 (Total number of reported “CB” Record Format 1 detail lines)  
Labor Charge = 0000000000  
Material Charge = 0000000000010000  
Material Sign = D  
Invoice Date = 080101  
Railinc Inbound Date Stamp (Railinc use only)  
Railinc Outbound Date Stamp (Railinc use only)

Record Format = 8 (for Detail Source GB)

Material Charge = 000000000210000  
Material Sign = D  
Invoice Date = 080101  
Tax Payer ID = XX-651-5042 (Required for Detail Source ZZ)  
Railinc Inbound Date Stamp (Input by Railinc)  
Railinc Outbound Date Stamp (Input by Railinc)

## G.2.4 Record Format 9

### Clarification on Data Exchange Record Format 9 Input (To Railinc)—Control

One Record Format 9 (Input) must be created by Data Exchange submitters and transmitted to Railinc with the information listed below. The Record Format 9 must contain the count of Format 1 records, the sum of the labor, and the sum of the material for the data records submitted. There must be only one Format 9 record in the file and it must be the last record in the file. Railinc uses this record for validation purposes.

Record Format = 9  
Billing/Invoicing party = XXXX  
Filler = ZZZZ  
Account Date = 0802  
Filler = ZZZZZZZZZZZZZZ  
Filler = Z  
Filler = ZZ  
Record Count = 0000123  
Labor Charge = 0000005000  
Material Charge = 0000000045000000  
Material Sign = D

---

**Important Note:** Reference the Record Format 9 ([Appendix G](#)) for the Required, Conditionally Required and Optional fields to report. **Required fields must be reported.**

---

### Clarification on Data Exchange Record Format 9 Output (From Railinc)—Control

One Record Format 9 (Output) must be created by Railinc and transmitted to Data Exchange recipients with the information listed below. The Record Format 9 contains the count of Format 1 records, the sum of the labor, and the sum of the material for the data records transmitted. Railinc will create one Format 9 record to be transmitted to each Data Exchange recipient for validation purposes.

Record Format = 9  
Filler = ZZZZ  
Billed Party = YYYY  
Account Date = 0802  
Filler = ZZZZZZZZZZZZZZ  
Filler = Z  
Filler = ZZ  
Record Count = 0000123  
Labor Charge = 0000005000  
Material Charge = 0000000045000000  
Material Sign = D

## G.3 Mandatory Record Format Order For Data Submission

---

**Important Note:** A submitted Data Exchange file will be rejected if the following order is not followed:

- All Format 1 records for each Detail Source must be grouped together.
  - One Format 8 record must exist for each detail source, following the corresponding Format 1 records.
  - One set of Format 6 records per invoice. (A set contains 1 record for each contact type: IQ, RT, EX, IP, BP)
  - One Format 8 ZZ record must contain the invoice total, following all other records for that invoice.
  - One Format 9 ZZ record must contain the total of all invoices in the file. This record must be the last entry in the file (for companies submitting multiple files, please contact [csc@railinc.com](mailto:csc@railinc.com) for more information).
- 

**Sample File Format Order—NOTE:** This example shows BR and GB detail sources, but any valid detail source records may be used.

1 GB (Detail Source GB detail record)  
1 GB (Detail Source GB detail record)  
8 GB (Detail Source GB sub-total record)  
1 BR (Detail Source BR detail record)  
1 BR (Detail Source BR detail record)  
8 BR (Detail Source BR sub-total record)  
6 IQ (Inquiry Contact information record)  
6 RT (Inquiry Remit To information record)  
6 EX (Exceptions information record)  
6 IP (Billing/Invoicing Party information record)  
6 BP (Billed Party information record)  
8 ZZ (Invoice #1 Total record)  
1 GB (Detail Source GB detail record)  
1 GB (Detail Source GB detail record)  
8 GB (Detail Source GB sub-total record)  
6 IQ (Inquiry Contact information record)  
6 RT (Inquiry Remit To information record)  
6 EX (Exceptions information record)  
6 IP (Billing/Invoicing Party information record)  
6 BP (Billed Party information record)  
8 ZZ (Invoice #2 Total record)  
9 ZZ (File Total record)

## Appendix H AAR Billing Repair Data (BRC)

### How to submit AAR billing repair data via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting detailed AAR billing repair data.

#### Detail AAR Billing Repair Data Records

When submitting (Detail Source "BR") AAR billing repair data records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party
- Repairing Party Invoice Number
- Repair Facility Type
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator set to "Y" if the AAR price master was used to edit/price record, otherwise set to "N"
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "BR" for AAR billing repair data billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number  
**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

**Example:** Railroad XXXX repairs car owner YYYY's railcar during railroad XXXX's January 2014 account month. Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Billing Repair Data Example						
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces						
	Field Name	Column	Length	Format**	Non-Wheel Detail Record	Wheel Detail Record
	Record Format	1	1	A/N	1	1
Invoice	Billing/Invoicing Party	2	4	A/N	XXXX	XXXX
	Billed Party	6	4	A/N	YYYY	YYYY
	Account Date (YYMM)	10	4	N	1401	1401

## Appendix I AAR Group Billable Repairs

### How to submit AAR group billable repairs via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting detailed AAR group billable repairs. Refer to AAR Office Manual Rule 112.

#### Detail AAR Group Billable Records

When submitting detail group billable records (Detail Source "GB") to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Quantity
- Condition Code
- Applied Job Code
- Why Made Code
- Removed Job Code
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator always set to "Y" (group billing must always use the AAR price master)
- Wrong Repair Indicator
- Narrative Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "GB" for AAR group billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

**Example:** Railroad XXXX repairs car owner YYYY's railcar during railroad XXXX's January 2014 account month. Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "GB" (Group Billable)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

AAR Group Billable Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	Original Detail Record
	Record Format	1	1	A/N	1
Invoice	Billing/Invoicing Party	2	4	A/N	XXXX
	Billed Party	6	4	A/N	YYYY
	Account Date (YYMM)	10	4	N	1401
	Invoice Number	14	16	A/N	12345
	Price Master File Indicator	30	1	A/N	U
	Detail Source	31	2	A/N	GB
Repair Header	Document Reference Number	33	15	A/N	
	Car Initial	48	4	A	YYYY
	Car Number	52	6	N	123456
	Kind of Car Symbol	58	1	A	
	Load/Empty Indicator	59	1	A/N	
	Repair Date (YYMMDD)	60	6	N	140101
	SPLC	66	6	N	380000
	Repairing Party	72	4	A/N	XXXX
	Repairing Party Invoice Number	76	16	A/N	12345
	Repairing Party Document Reference Number	92	15	A/N	
	Repair Facility Type	107	2	A/N	ET

AAR Group Billable Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	Original Detail Record
Repair Detail	Location on Car	109	2	A/N	
	Reserved for future CRB use	111	1	A/N	
	Reserved for future CRB use	112	1	N	0

## Appendix J Defect Card and Defect Card Rebuttal Records

### How to submit defect card billing via the AAR/Railinc Data Exchange system

For defect card billing there are three detail source codes that can be submitted through the AAR/Railinc Data Exchange system. The first, "DC" (Defect Card), is the original repairing party submitting the repair records to the Billed Party. The second, "DR" (Defect Card Rebuttal Billing), is the Billed Party rebuttal billing the defect road for the repairs. The third, "JD" (Joint Inspection/Defect Card Billing-Retired/Dismantled Unit), is **only to be used when** a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9). "JD" billing should be submitted per [Appendix W](#).

---

**Important Note:** Detail Source 'DC' must always be used when reporting an initial Data Exchange submission by an intermediate repairing party to the car owner or an initial data exchange submission by the car owner to the issuing party.

---

**Important Note:** Detail Source "JD" (Joint Inspection/Defect Card Billing for Retired/Dismantled Unit), is **only to be used when** a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9). This billing must be submitted per [Appendix W](#).

---

Listed below are some guidelines for submitting detailed defect card billing.

### J.1 Detail Defect Card Original Records

When submitting **detail** defect card **original** records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- AAR Component ID (CID)
- Line Number

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "DC" for defect card

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

**Example:** (Original Record) Railroad XXXX repairs Car Mark owner YYYY's railcar on December 20, 2013, under the authority of defect card dated December 1, 2013 from railroad ZZZZ. Car Mark owner YYYY submits the repair record during railroad XXXX's January 2014 account month. Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "DC" (Defect Card)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Defect Card/JIC Party** = "ZZZZ"

**Defect Card/JIC Date** = "131201"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## J.2 Detail Defect Card Rebuttal Records

When submitting **detail** defect card **rebuttal** records to Data Exchange the following fields must be filled in with the same values as received from the original repairing party.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date (YYMMDD)
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator

- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "DR" for Defect Card rebuttal

**Document Reference Number** is optional

**Repairing Party** must be set to the **Billing/Invoicing Party** value used in the original invoice record

**Repairing Party Invoice Number** must be set to the **Invoice Number** value used in the original invoice record

**Repairing Party Document Reference Number** must be set to the **Document Reference Number** value, if it was used in the original invoice record.

**Example:** (Continued from [J.1](#) Original Defect Card example) Car Owner YYYY pays railroad XXXX's invoice and identifies that some of the repairs are covered by a defect card from company ZZZZ. Car Owner YYYY generates detail defect card rebuttal billing records in their next receivable accounting cycle to bill company ZZZZ for the repairs. Car Owner YYYY submits the defect card rebuttal records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "YYYY"  
**Billed Party** = "ZZZZ"  
**Account Date** = "1402"  
**Invoice Number** = "7777777"  
**Detail Source** = "DR" (Defect Card Rebuttal Billing)  
**Document Reference Number** = spaces  
**Repairing Party** = "XXXX"  
**Repairing Party Invoice Number** = "12345"  
**Repairing Party Document Reference Number** = spaces (not filled in)  
**Defect Card/JIC Party** = "ZZZZ"  
**Defect Card/JIC Date** = "131201"

The rest of the fields on the Format 1 record are copied from the original Data Exchange record submitted by railroad XXXX.

Defect Card/JIC and Rebuttal Record Examples						
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces

## Appendix K Joint Inspection Certificate

### How to submit joint inspection certificate (JIC) billing via the AAR/Railinc Data Exchange system

For JIC billing there are three detail source codes that can be submitted through the AAR/Railinc Data Exchange system. The first, "JI" (JIC), is the original repairing party submitting the repair records to the Billed Party. The second, "JR" (JIC Rebuttal Billing), is the Billed Party rebuttal billing the JIC road for the repairs. The third, "JD" (Joint Inspection/Defect Card Billing-Retired/Dismantled Unit), is **only to be used when** a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9). "JD" billing should be submitted per [Appendix W](#).

---

**Important Note:** Detail Source 'JI' must always be used when reporting an initial Data Exchange submission by an intermediate repairing party to the car owner or an initial data exchange submission by the car owner to the issuing party.

---

**Important Note:** Detail Source "JD" (Joint Inspection/Defect Card Billing for Retired/Dismantled Unit), is **only to be used when** a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9). This billing must be submitted per [Appendix W](#).

---

Listed below are guidelines for submitting detailed JIC billing.

### K.1 Detail JIC Original Records

When submitting **detail JIC original** records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- AAR Component ID (CID)
- Line Number

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "JI" for JIC

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

**Example:** Railroad XXXX repairs car mark owner YYYY's railcar during railroad XXXX's January 2014 account month under the authority of an endorsed JIC from railroad ZZZZ dated December 20, 2013. Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "JI" (JIC)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Defect Card/JIC Party** = "ZZZZ"

**Defect Card/JIC Date** = "131220"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## K.2 Detail JIC Rebuttal Records

When submitting **detail JIC rebuttal** records to Data Exchange the following fields must be filled in with the same values as received from the original repairing party.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Material Charge
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party

- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date
- Labor Charge
- Material Sign
- Machine Priceable Indicator
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "JR" for JIC rebuttal

**Document Reference Number** is optional.

**Repairing Party** must be set to the **Billing/Invoicing Party** value used in the original invoice record

**Repairing Party Invoice Number** must be set to the **Invoice Number** value used in the original invoice record

**Repairing Party Document Reference Number** must be set to the **Document Reference Number** value, if it was used in the original invoice record.

**Example:** (Continued from [K.1](#) Original JIC example) Car Mark Owner YYYY pays Repairing Party XXXX's invoice and identifies that some of the repairs are covered by a JIC from company ZZZZ. Car Mark Owner YYYY generates detail JIC rebuttal billing records in their next receivable accounting cycle to bill company ZZZZ for the repairs. Car Mark Owner YYYY submits the JIC rebuttal records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "ZZZZ"

**Account Date** = "1402"

**Invoice Number** = "7777777"

**Detail Source** = "JR" (JIC Rebuttal)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Defect Card/JIC Party** = "ZZZZ"

**Defect Card/JIC Date** = "131220"

The rest of the fields on the Format 1 record are copied from the original Data Exchange record submitted by Repairing Party XXXX.

Joint Inspection Certificate (JIC) Examples						
	Field Name	Column	Length	Format**	Original Detail Record	Rebuttal Detail Record

## Appendix L Lease Rebuttal Records

### How to submit lessor/lessee rebuttal billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting detailed lease rebuttal billing.

#### L.1 Detail Lease Rebuttal Records

When submitting **detail** lease rebuttal records (Detail Source "RE") to Data Exchange the following fields must be filled in with the same values as received from the original repairing party.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the lessor/lessee's initial

**Billed Party** must be filled in with the lessee/lessor's initial

**Account Date** must be filled in with the lessor/lessee's account date (year/month format)

**Invoice Number** must be filled in with the lessor/lessee's invoice number

**Detail Source** must always be set to "RE" for rebuttal billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold the lessor/lessee's lease number or any meaningful value to the lessor or lessee.

If **any** of the following fields contain a non-blank value, all fields must be filled in with the same values as submitted by the original repairing party:

- Repairing Party
- Repairing Party Invoice Number
- Repairing Party Document Reference Number

If **all** of the following fields are blank, they must be filled in as indicated below:

**Repairing Party** must be set to the Billing/Invoicing Party value

**Repairing Party Invoice Number** must be set to the Invoice Number value

**Repairing Party Document Reference Number** must be set to the Document Reference Number value

**Note:** The original billing passes through Data Exchange as a typical BR record.

**Example:** (Original Record) Railroad XXXX repairs Mark Owner YYYY's railcar during railroad XXXX's January 2014 account month. Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "BR" (for billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

The rest of the fields on the Format 1 record are filled in based on the repairs performed

**Note:** Now the rebuttal record is created based on the original BR record.

**Example:** (Rebuttal Record) Mark Owner YYYY (lessee) invoices car owner ZZZZ as per lease agreement. Mark Owner YYYY (lessee) submits the lease rebuttal records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "ZZZZ"

**Account Date** = "1402"

**Invoice Number** = "7777777"

**Detail Source** = "RE" (Rebuttal Billing)

**Document Reference Number** = spaces

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

The rest of the fields on the Format 1 record are copied from the original Data Exchange record submitted by railroad XXXX.

Lease Rebuttal Example						
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces						
	Field Name	Column	Length	Format**	Original Record	Rebuttal Detail Record
	Record Format	1	1	A/N	1	1
Invoice	Billing/Invoicing Party	2	4	A/N	XXXX	YYYY
	Billed Party	6	4	A/N	YYYY	ZZZZ
	Account Date (YYMM)	10	4	N	1401	1402
	Invoice Number	14	16	A/N	12345	7777777
	Price Master File Indicator	30	1	A/N	U	U
Repair Header	Detail Source	31	2	A/N	BR	RE
	Document Reference Number	33	15	A/N		
	Car Initial	48	4	A	YYYY	YYYY
	Car Number	52	6	N	123456	123456
	Kind of Car Symbol	58	1	A	F	F
	Load/Empty Indicator	59	1	A/N	E	E
	Repair Date (YYMMDD)	60	6	N	140120	140120
	SPLC	66	6	N	380000	380000
	Repairing Party	72	4	A/N	XXXX	XXXX
	Repairing Party Invoice Number	76	16	A/N	12345	12345
	Repairing Party Document Reference Number	92	15	A/N		
	Repair Facility Type	107	2	A/N	RT	RT

Lease Rebuttal Example						
	** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	Original Record	Rebuttal Detail Record
Repair Detail	Location on Car	109	2	A/N	R	R
	Reserved for future CRB use	111	1	A/N

## Appendix M Counter Billing Authority (CBA)

### How to submit Counter Billing Authority (CBA) billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting summary records for Counter Billing Authority.

#### M.1 Counter Billing Authority (CBA) Records

When submitting Counter Billing Authority (CBA) records to Data Exchange (Detail Source "CB") the following fields must be filled in. ***One summary record format 8 per invoice (detail source CB) must be submitted per CBA.***

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date
- Invoice Number (YYMM)
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source set to "CB"
- Document Reference Number set to "CBA20140101XXXX"
- Repairing Party Invoice Number set to the CBA issuing party's original invoice number (if unknown use CBA number). In the case of an MID CBA, use the following guideline in the order listed:
  - 1) Use the MID CBA number. (Note: If greater than 16-bytes, then enter the first 16-bytes.)
  - 2) Use the invoice number if no MID CBA number was furnished.
  - 3) Use the file number if no MID CBA number or invoice number was furnished.
  - 4) Use a default: "MID CBA mmddyy" if none of above was furnished in the order listed.
- Repair Facility Type set to spaces
- Location on Car set to spaces
- Quantity set to zeros
- Condition Code set to spaces
- Applied Job Code set to zeros
- Applied Qualifier set to spaces
- Why Made Code set to spaces
- Removed Job Code set to zeros
- Removed Qualifier set to spaces
- Responsibility Code set to spaces
- Defect Card/JIC Party set to spaces
- Defect Card/JIC Date (YYMMDD) set to zeros
- Labor Charge set zeros
- Material Charge set to dollar amount in the CBA letter
- Material Sign set to "D" (debit)
- Car Initial set to spaces
- Car Number set to zeros
- Kind of Car Symbol set to spaces
- Load/Empty Indicator set to spaces
- Repair Date (YYMMDD) set to the CBA date
- SPLC
- Repairing Party set to the CBA issuing party's initial
- Machine Priceable Indicator set to "N" (summary records are not machine priced)
- Wrong Repair Indicator set to "N"
- Narrative & Wheel Information set to "CBA" or other meaningful description as defined in C.3
- Labor Rate set to zeros
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the CBA issuing party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "CB"

**Document Reference Number** must contain the CBA number

**Repairing Party** set to the CBA issuing party's initial

**Repairing Party Invoice Number** set to the CBA issuing party's original invoice number (if unknown use CBA number). In the case of an MID CBA, use the following guideline in the order listed:

- 1) Use the MID CBA number. (Note: If greater than 16-bytes, then enter the first 16-bytes.)
- 2) Use the invoice number if no MID CBA number was furnished.
- 3) Use the file number if no MID CBA number or invoice number was furnished.
- 4) Use a default: "MID CBA mmddyy" if none of above was furnished in the order listed.

**Repairing Party Document Reference Number** set to spaces

**Example:** On January 1, 2014 railroad YYYY authorizes car owner XXXX to bill them for incorrect repairs identified by car owner XXXX during their audit. Railroad YYYY sends a Counter Billing Authorization letter to car owner XXXX to invoice railroad YYYY for the amount of the exception letter (\$100). Car Owner XXXX submits the CBA record to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1402"

**Invoice Number** = "12345"

**Detail Source** = "CB" (Counter Billing Authority)

**Document Reference Number** = "CBA20140101XXXX"

**Repairing Party** = "YYYY"

**Repairing Party Invoice Number** = "YYYY INV#0001"

**Repairing Party Document Reference Number** = spaces

The rest of the fields on the Format 1 record are filled in as indicated previously for CBA records.

Counter Billing Authority (CBA) Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	CBA Summary Record

## Appendix N Tax Records

### How to submit taxes via the AAR/Railinc Data Exchange system

There are several types of taxes that can be submitted via the AAR/Railinc Data Exchanges system. All tax records can be reported in one of two ways. The first is to create a detailed tax Format 1 record by billing repair data at an individual car level. The second is to create an aggregate (summary)tax Format 8 record at an invoice level.

---

**Important Note:** Of these two methods the preferred method is for reporting at an aggregate tax Format 8 record at an invoice level.

---

Below is a list of the valid Detail Source Codes for taxes:

**GT** = Canadian Goods and Services Tax (GST)  
**PT** = Canadian Provincial Sales Tax (PST)  
**QT** = Quebec Sales Tax (QST)  
**HT** = Canadian Harmonized Tax (HST)  
**IV** = Imposed Value Added Mexican Tax (IVA)

Listed below are guidelines for submitting tax records.

### N.1 Tax Records

When submitting tax records to Data Exchange the following fields must be filled in. Since these are aggregate records most of the fields are initialized to either spaces or zeros. One or more tax record **must be submitted** for any applicable tax detail source code (i.e., GT, PT, QT, HT, IV) per invoice. The list of fields below refers to the Record Format 1

- Record Format (must be " 1 ")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source set to the appropriate value for the tax being applied
- Document Reference Number
- Car Initial set to the initial of the car being repaired
- Car Number set to the number of the car being repaired
- Kind of Car Symbol set to the car's kind of car
- Load/Empty Indicator set to appropriate value for the car being repaired
- Repair Date (YYMMDD) set to the date the car was repaired
- SPLC set to location where the repairs were made
- Repairing Party
- Repairing Party Invoice Number
- Repair Facility Type set to type of location where the repairs were made
- Location on Car set to spaces
- Quantity set to "0001"
- Condition Code set to "1"
- Applied Job Code set to "8530", the NIT league code for taxes
- Applied Qualifier set to spaces
- Why Made Code set to "09"
- Removed Job Code set to "8530"
- Removed Qualifier set to spaces
- Responsibility Code set to "1"

- Defect Card/JIC Party set to either spaces or the value on the defect card or JIC
- Defect Card/JIC Date (YYMMDD) set to blank or the value on the defect card or JIC
- Labor Charge set zeros
- Material Charge set to tax dollar amount
- Material Sign set to either "D" (debit) or "C" (credit) to indicate if the material billed is positive or negative
- Machine Priceable Indicator set to "N" (summary records are not machine priced)
- Wrong Repair Indicator set to "N"
- Narrative & Wheel Information set to the standard description for job code, eg: "8530"
- Labor Rate set to zeros
- Expanded SPLC set to the location where the repairs were made
- Repair Facility Arrival Date (YYMMDD) set to the date the equipment arrived if available
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below for Record Format 1:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to one of the values listed previous (i.e. GT, HT, PT, QT, IV)

**Document Reference Number** is conditional. It is only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** set to the billing party's initial

**Repairing Party Invoice Number** set to the billing party's initial

**Repairing Party Document Reference Number** If present, set to the billing party's document reference number

### **N.1.1 Example 1—Canadian Taxes: Creating an Aggregate Tax Format 8 Record at an Invoice Level**

Canadian tax laws require that taxes be charged on all repairs to the Canadian registered car owner. Canadian registered entity YYYY repairs Canadian registered car owner XXXX's railcars on January 1, 2014. Canadian registered entity YYYY submits the aggregate repair record to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "YYYY"  
**Billed Party** = "XXXX"  
**Account Date** = "1401"  
**Invoice Number** = "12345"  
**Price Master File Indicator** = "C"  
**Detail Source** = "GT" (Canadian Goods and Services Tax)  
Record Count = "0000008"  
Labor Charge = "0000000"  
Material Charge = "00001000"  
Sign = "D"  
Invoice Date = "120705"  
Tax Payer Id = "987654321"  
Payment Terms = "10"  
Payment Due Date = "120715"

Refer to Appendix G for more information on the format

<b>Canadian Taxes:</b>

## N.1.2 Example 2—Canadian Taxes: Creating a Detail Tax Format 1 Record by Billing Repair Data at an Individual Car Level

Canadian tax laws require that taxes be charged on all repairs to the Canadian registered car owner. Canadian registered entity YYYY repairs Canadian registered car owner XXXX's railcars on January 1, 2014. Canadian registered entity YYYY submits a detail tax repair record for each individual car to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "XXXX"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Price Master File Indicator** = "C"

**Detail Source** = "GT" (Canadian Goods and Services Tax)

**Document Reference Number** = spaces

**Car Initial** = XXXX

**Car Number** = 654321

**Repairing Party** = "YYYY"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces

**Kind of Car Symbol** = "F"

**Load/Empty Indicator** = "E"

**Repair Date (YYMMDD)** = "080101"

**SPLC** = "038000"

**Repairing Party** = "YYYY"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** set to spaces

**Repair Facility Type** "ET"

**Location on Car** set to spaces

**Quantity** set to "0001"

**Condition Code** set to "1"

**Applied Job Code** set to "8530", the NIT League code for taxes

**Applied Qualifier** set to spaces

**Why Made Code** set to "09"

**Removed Job Code** set to "8530"

**Removed Qualifier** set to spaces

**Responsibility Code** set to "1"

**Labor Charge** set zeros

**Material Charge** = "00001000" (\$10.00)

**Material Sign** = "D" (debit)

**Machine Priceable Indicator** = "N" (summary records are not machine priced)

**Wrong Repair Indicator** set to "N"

**Narrative & Wheel Information** set to the standard description for job code "8530"

**Labor Rate** set to zeros

**Expanded SPLC** set to the location where the repairs were made

**Repair Facility Arrival Date (YYMMDD)** set to the date the equipment arrived if available

**Line Number**

**Resubmitted Invoice Number**

**Original Invoice Date**

**Original Account Date**

### **N.1.3 Example 3—Mexican Tax: Creating an Aggregate Tax Format 8 Record at an Invoice Level**

Mexican tax laws require that taxes be charged on all repairs to other Mexican car mark owners only. Mexican entity YYYY repairs Mexican car mark owner XXXX's railcar on January 1, 2008. Mexican entity YYYY submits the aggregate repair record to the Data Exchange system and fills in the following fields:

**Important Note:** Mexican entities only report IVA aggregate tax Format 8 records at an invoice level.

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "XXXX"

**Account Date** = "0801"

**Invoice Number** = "123456"

## Appendix O Shop Billing

### How to submit shop billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting detailed Shop Billing (Detail Source "SH").

---

**Important Note:** Shop Billing as defined in this Appendix is not intended as a substitute for Running Repair Agents (AAR Office Manual - Appendix H). Shop Billing referenced in this Appendix is for use in bilateral agreements between contract shops and car owners. For Detail Source "SH", Running Repair Agent mark as defined in AAR Office Manual Appendix H would not be a valid Billing/Invoicing Party.

---

### O.1 Detail Shop Billing Records

When submitting detail defect shop billing records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source (SH)
- Document Reference Number
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party
- Repairing Party Invoice Number
- Repairing Party Document Reference Number
- Repair Facility Type (CS) optional field
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date (YYMMDD)
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator always set to "N" (shop billing does not use the AAR price master)
- Wrong Repair Indicator
- Narrative & Wheel Information set to meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "SH" for shop billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

**Example:** Shop XXXX repairs car owner YYYY's railcar during shop XXXX's January 2014 account month.

Shop XXXX submits the repair records to the Data Exchange system and fills in the following fields:

---

**Important Note:** Shop Billing as defined in this Appendix is not intended as a substitute for Running Repair Agents (AAR Office Manual—Appendix H). Shop Billing referenced in this Appendix is for use in bilateral agreements between contract shops and car owners. For Detail Source "SH", Running Repair Agent mark as defined in AAR Office Manual Appendix H would not be a valid Billing/Invoicing Party.

---

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "SH" (for shop billing)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Repair Facility Type** = "CS" (Contract Shop)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## Appendix P Running Repair Agent Reporting (AAR Office Manual—Appendix H or the Running Repair Agent Category in FindUs.Rail)

### How to submit Running Repair Agent reporting via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting detailed Running Repair Agent data.

---

**Important Note:** Running Repair Agent billing is not intended as a substitute for Shop Billing. Shop Billing as referenced in [Appendix O](#) of this document is for use in bilateral agreements between contract shops and car owners. For any Detail Source other than "SH", the Running Repair Agent mark as defined in AAR Office Manual Appendix H would be the only valid Billing/Invoicing Party.

---

---

**Important Note:** A new Running Repair Agent is required to contact [RR.agents@railinc.com](mailto:RR.agents@railinc.com) to receive the documents required to register as a Railroad Running Repair Agent. Once the Running Repair Agent has been assigned a Running Repair Agent mark (ex: A000) they will need to notify the Railroad (XXXX) that they are an agent. It is up to Railroad (XXXX) to notify AAR/Railinc of the new Running Repair Agent at a SPLC location (ex: 380000) so it may be published in Appendix H of the AAR Office manual or in the Running Repair Agent Category in FindUs.Rail.

---

### P.1 Detail Running Repair Agent Records

When submitting detail Running Repair Agent records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party report Sponsoring Railroad reporting mark.
- Repairing Party Invoice Number report Running Repair Agents Invoice Number.
- Repairing Party Document Reference Number report Running Repair Agent Document Reference Number.
- Repair Facility Type
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator set to "Y" if the AAR price master was used to edit/price the record, otherwise set to "N"

- Wrong Repair Indicator
- Narrative & Wheel Information set to meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- AAR Component ID (CID)
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the Running Repair Agent mark

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the Running Repair Agents Invoice Number

**Detail Source** must always be set to "BR" for AAR billing repair data billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the Sponsoring Railroad's reporting mark.

**Repairing Party Invoice Number** must be set to the Running Repair Agents invoice number

**Repairing Party Document Reference Number**, if present, must be set to the Running Repair Agents document reference number

### P.1.1 Example 1—for Responsibility Code 1

Running Repair Agent (A000) submits the repair records in the January 2014 account month as the agent of Railroad (XXXX) to Railinc for Billed Party (YYYY) Data Exchange system and fills in the following fields:

---

**Important Note:** Running Repair Agent billing is not intended as a substitute for Shop Billing. Shop Billing as referenced in [Appendix O](#) of this document is for use in bilateral agreements between contract shops and car owners. For any Detail Source other than "SH", the Running Repair Agent mark as defined in AAR Office Manual Appendix H would be the only valid Billing/Invoicing Party.

---

**Billing/Invoicing Party** = "A000" (Running Repair Agent mark)

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345" (Running Repair Agents Invoice Number)

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = "12345" (Running Repair Agent Document Reference Number)

**Repair Date** = "140101"

**SPLC** = "380000"

**Repairing Party** = "XXXX" (Sponsoring Railroad)

**Repairing Party Invoice Number** = "12345" (Running Repair Agents Invoice Number)

**Repairing Party Document Reference Number** = "12345" (Running Repair Agent Doc.Ref.Number)

**Responsibility Code** = "1"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## P.1.2 Example 2—for Responsibility Code 2 (Handling Line Responsibility)

Running Repair Agent (A000) submits Handling Line responsibility repair records with the following fields populated in the January 2014 account month as the agent of Railroad (XXXX) for Billed Party (YYYY) to Railinc Data Exchange system:

**Billing/Invoicing Party** = "A000" (Running Repair Agent mark)  
**Billed Party** = "YYYY"  
**Account Date** = "1401"  
**Invoice Number** = "12345" (Running Repair Agents Invoice Number)  
**Detail Source** = "BR" (Billing repair data)  
**Car Initial** = 'YYYY'  
**Car Number** = '123456'  
**Document Reference Number** = "12345" (Running Repair Agent Document Reference Number)  
**Repair Date** = "140101"  
**SPLC** = "380000"  
**Repairing Party** = "XXXX" (Sponsoring Railroad)  
**Repairing Party Invoice Number** = "12345" (Running Repair Agents Invoice Number)  
**Repairing Party Document Reference Number** = "12345" (Running Repair Agent Doc.Ref.Number)  
**Responsibility Code** = "2"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## P.1.3 Example 3—for Responsibility Code 3

Running Repair Agent (A000) repairs car mark owner YYYY's railcar as the agent of Railroad XXXX on January 1, 2014 during running repair agents January 2014 account month under the authority of a Defect Card from Railroad ZZZZ dated December 1, 2013.

**Billing/Invoicing Party** = "A000" (Running Repair Agent mark)  
**Billed Party** = "YYYY"  
**Account Date** = "1401"  
**Invoice Number** = "12345" (Running Repair Agents Invoice Number)  
**Detail Source** = "DC" (Defect Card/JIC Party)  
**Document Reference Number** = "12345" (Running Repair Agent Document Reference Number)  
**Repair Date** = "140101"  
**SPLC** = "380000"  
**Repairing Party** = "XXXX" (Sponsoring Railroad)  
**Repairing Party Invoice Number** = "12345" (Running Repair Agents Invoice Number)  
**Repairing Party Document Reference Number** = "12345" (Running Repair Agent Doc.Ref.Number)  
**Responsibility Code** = "3"  
**Defect Card /JIC Party** = "ZZZZ"  
**Defect Card /JIC Date** = "131201"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## Appendix Q    Destroyed Unit Records (Rule 107)

### How to submit destroyed unit billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting destroyed unit billing for Detail Source DE.

#### Q.1    Destroyed Unit Records

When submitting (Detail Source "DE") destroyed unit records to Data Exchange the following fields must be filled in. Since these are summary records most of the fields are initialized to either spaces or zeros. ***One record must be submitted for each piece of equipment.*** Refer to Rule 112 for more information on billing for destroyed equipment.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source
- Car Initial set to the destroyed car's initial
- Car Number set to the destroyed car's number
- Kind of Car Symbol set to the destroyed car's kind of car
- Load/Empty Indicator set to "U"
- Repair Date (YYMMDD) set to the date of the authorization letter issued by the destroying party to invoice them for the destroyed equipment
- SPLC
- Repair Facility Type set to spaces
- Location on Car set to default location "B"
- Quantity set to "1"
- Condition Code set to "1"
- Applied Job Code set to "5199"
- Applied Qualifier set to "ZF"
- Why Made Code set to appropriate Why Made Code
- Removed Job Code set to "5199"
- Removed Qualifier set to "ZF"
- Responsibility Code set to "3"
- Defect Card/JIC Party set to the initial of the destroying party issuing the authorization
- Defect Card/JIC Date (YYMMDD) set to the date settlement was accepted in DDCT allowing the destroying party to invoice for the destroyed equipment
- Labor Charge set to zeros
- Material Charge set to dollar amount in the authorization letter
- Material Sign set to "D"
- Machine Priceable Indicator set to "N" (summary records are not machine priced)
- Wrong Repair Indicator set to "N"
- Narrative & Wheel Information set to meaningful description as defined in C.3
- Labor Rate set to zeros
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD) set to spaces
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the destroying party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "DE" for Destroyed Equipment

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** set to the Billing/Invoicing Party's initial

**Repairing Party Invoice Number** set to the Billing/Invoicing Party's initial

**Repairing Party Document Reference Number** set to the Billing/Invoicing Party's document reference number

**Example:** Railroad YYYY destroys in a derailment car mark owner XXXX's railcar on January 1, 2014. On January 3, 2014 car mark owner XXXX accepts settlement in DDCT and invoices railroad YYYY for the depreciated value of the railcar \$25,000. Car mark owner XXXX fills in the following fields and submits the repair records to the Data Exchange system:

**Record Format** (must be "1")

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "DE" (Destroyed Equipment)

**Document Reference Number** (if known and available)

**Repair Date** = "140103" (authorization date)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** (if known and available)

**Location** = "B" (default location)

**Quantity** = "1"

**Condition Code** = "1"

**Applied Job Code** = "5199"

**Applied Qualifier** = "ZF"

**Why Made Code** = "33"

**Removed Job Code** = "5199"

**Removed Qualifier** = "ZF"

**Responsibility Code** = "3"

**Defect Card/JIC Party** = "YYYY"

**Defect Card/JIC Date** = "140103" (authorization date)

**Material Charge** = "02500000"

**Material Sign** = "D"

The rest of the fields on the Format 1 record are filled in as indicated previously for destroyed unit records.

Destroyed Unit Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	Destroyed Unit Record
	Record Format	1	1	A/N	1

## Appendix R Dismantled Unit (Rule 107 and Rule 108)

### How to submit Dismantled Unit billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting dismantled unit billing.

#### R.1 Dismantled Unit Records

When submitting dismantled unit records to Data Exchange (Detail Source "DM") the following fields must be filled in. Refer to **Rules 107 and 108** for more information on billing for dismantled equipment.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source
- Car Initial set to the dismantled car's initial
- Car Number set to the dismantled car's number
- Kind of Car Symbol set to the dismantled car's kind of car
- Load/Empty Indicator set to "U"
- Repair Date (YYMMDD) set to the date of the authorization letter issued by the car owner to the dismantling party to invoice for the dismantled equipment
- SPLC
- Repair Facility Type set to spaces
- Location on Car set to default location "B"
- Quantity set to "1"
- Condition Code set to "1"
- Applied Job Code set to "5299"
- Applied Qualifier set to "ZF"
- Why Made Code set to "25"
- Removed Job Code set to "5299"
- Removed Qualifier set to "ZF"
- Responsibility Code set to "3"
- Defect Card/JIC Party set to the initials of the car owner issuing the authorization
- Defect Card/JIC Date (YYMMDD) set to the dismantle date in DDCT issued by the car owner to the dismantling party to invoice for the dismantled equipment
- Labor Charge set to zeros
- Material Charge set to dollar amount in the authorization letter
- Material Sign set to either (D) debit or (C) credit to indicate if the material billed is positive or negative
- Machine Priceable Indicator set to (N) (summary records are not machine priced)
- Wrong Repair Indicator set to "N"
- Narrative & Wheel Information set to meaningful description as defined in C.3
- Labor Rate set to zeros
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice Date
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing/invoicing party's initial

**Billed Party** must be filled in with the destroying party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "DM" for dismantled equipment/unit

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** set to the billing party's initial

**Repairing Party Invoice Number** set to the billing party's initial

**Repairing Party Document Reference Number** set to the billing party's document reference number

### R.1.1 Debit Example

Railroad YYYY is in possession of car mark owner XXXX's equipment that requires extensive repairs. Car mark owner XXXX decides not to repair the equipment; cost to dismantle exceeds value of car by \$2000. Authorization to dismantle is provided to Railroad. Railroad YYYY will invoice car mark owner XXXX for the agreed to settlement value (per Rule 108) of the railcar. Authorization date to Dismantle Equipment is January 3, 2014. Railroad YYYY fills in the following fields and submits the Job Code 5299 repair record to the Data Exchange system:

**Record Format** (must be "1")

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "XXXX"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "DM" (Dismantled Equipment)

**Car Initial** = "XXXX"

**Car Number** = "123456"

**Document Reference Number** (if known and available)

**Repair Date** = "140103" (authorization date)

**Repairing Party** = "YYYY"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** (if known and available)

**Applied Job Code** = "5299"

**Why Made Code** = "25"

**Removed Job Code** = "5299"

**Responsibility Code** = "3"

**Defect Card/JIC Party** = "XXXX" (authorization party)

**Defect Card/JIC Date** = "140103" (authorization date)

**Material Charge** = "00200000"

**Material Sign** = "D"

### R.1.2 Credit Example

Railroad YYYY is in possession of car mark owner XXXX's equipment that requires extensive repairs. Car mark owner XXXX decides not to repair the equipment; cost to dismantle is less than the value of car by \$2000. Authorization to dismantle is provided to Railroad. Railroad YYYY will provide credit on an invoice to the car mark owner XXXX for the agreed to settlement value (per Rule 108) of the railcar. Railroad YYYY fills in the following fields and submits the Job Code 5299 repair record to the Data Exchange system:

**Record Format** (must be "1")

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "XXXX"  
**Account Date** = "1401"  
**Invoice Number** = "12345"  
**Detail Source** = "DM" (Dismantled Equipment)  
**Car Initial** = "XXXX"  
**Car Number** = "123456"  
**Document Reference Number** (if known and available)  
**Repair Date** = "140103" (authorization date)  
**Repairing Party** = "YYYY"  
**Repairing Party Invoice Number** = "12345"  
**Repairing Party Document Reference Number** (if known and available)  
**Applied Job Code** = "5299"  
**Why Made Code** = "25"  
**Removed Job Code** = "5299"  
**Responsibility Code** = "3"  
**Defect Card/JIC Party** = "XXXX" (authorization party)  
**Defect Card/JIC Date** = "140103" (authorization date)  
**Material Charge** = "00200000"  
**Material Sign** = "C"

The rest of the fields on the Format 1 record are filled in as indicated previously for dismantled unit records.

## Appendix S Material Supplied (Rule 85)

### How to submit Material Supplied (Rule 85) billing via the AAR/Railinc Data Exchange system

Listed below are guidelines for submitting Material Supplied (Rule 85) billing.

#### S.1 Material Supplied (Rule 85) Records

When submitting Material Supplied (Rule 85) records to Data Exchange (Detail Source "MA") the following fields must be filled in:

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source = 'MA'
- Document Reference Number
- Car Initial set to the initial of the car the material was ordered for
- Car Number set to the number of the car the material was ordered for
- Kind of Car Symbol set to the car's kind of car
- Load/Empty Indicator set to appropriate value for the car being repaired
- Repair Date (YYMMDD) set to the date the material was shipped
- SPLC set to location where the material will be shipped to
- Repairing Party
- Repairing Party Invoice Number
- Repairing Party Document Reference Number
- Repair Facility Type set to spaces
- Location on Car set to default location "B"
- Quantity set to the appropriate value for the material ordered
- Condition Code set to the appropriate value for the material ordered
- Applied Job Code set to "5999"
- Applied Qualifier set to the appropriate car part supplied
- Why Made Code set to the appropriate value for the material ordered
- Removed Job Code set to "5999"
- Removed Qualifier set to the appropriate car part supplied
- Responsibility Code set to "3"
- Defect Card/JIC Party set to the ordering party's initial
- Defect Card/JIC Date (YYMMDD) set to the date the material was shipped
- Labor Charge set zeros
- Material Charge set to the appropriate charge for the material per the AAR rules
- Material Sign set to either debit "D" or credit "C" to indicate if the material billed is positive or negative
- Machine Priceable Indicator set to "N"
- Wrong Repair Indicator set to "N"
- Narrative & Wheel Information set to the standard description associated for the material ordered set to meaningful description as defined in C.3
- Labor Rate set to zeros
- Expanded SPLC set to the location where the material will be shipped to
- Repair Facility Arrival Date (YYMMDD)
- Line Number

Note 1 – alternately, Removed Job Code may be set to the specific job code of the material supplied.

Note 2 – alternately, if the specific job code of the material supplied is shown in the Removed Job Code field, Removed Qualifier may be set to the appropriate numeric qualifier for that job code.

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the car owner's initial

**Billed Party** must be filled in with the ordering party's initial

**Account Date** must be filled in with the car owner's account date (YYMM)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "MA" (Material Supplied)

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** set to the ordering party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number** must be set to the repairing party's document reference

**Example:** On January 1, 2014, railroad XXXX orders 1 new group EOC-8B unit (Job Code 5746) from car owner YYYY to repair a railcar during car owner YYYY's January 2014 account month. This material was shipped on January 3, 2014. Car owner YYYY submits the Material Supplied (Rule 85) records to the Data Exchange system with the following fields filled in:

**Billing/Invoicing Party** = "YYYY"

**Billed Party** = "XXXX"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "MA" (Material Supplied)

**Document Reference Number** = "PO#123456"

**Car Initial** = "YYYY"

**Car Number** = "123456"

**Repair Date** = "140103" (shipped date)

**SPLC** = "380000"

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = "PO#123456"

**Location on Car** = "B" (default location)

**Quantity** = "0001"

**Condition Code** = "1"

**Applied and Removed Job Code** = "5999"

**Applied and Removed Qualifier** = "GQ"

**Why Made Code** = "09"

**Responsibility Code** = "3"

**Defect Card/JIC Party** = "XXXX"

**Defect Card/JIC Date** = "140103" (shipped date)

The rest of the fields on the Format 1 record are filled in as described above.

Note 1 – alternately, Removed Job Code may be set to the specific job code of the material supplied.

Note 2 – alternately, if the specific job code of the material supplied is shown in the Removed Job Code field, Removed Qualifier may be set to the appropriate numeric qualifier for that job code.

Material Supplied (Rule 85) Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces

## Appendix T Settlement Value Adjustment (Rule 107)

### How to submit Settlement Value Adjustment via the AAR/Railinc Data Exchange system

Credit for wrecked unit billing exceeding settlement value.

Listed below are guidelines for submitting (Detail Source "JI" or "DC" or "DR" or "JR" or "JD") a settlement value adjustment with Defect Card or JIC billing. Credit adjustment is required to be made within the same accounting month. This adjustment must be reported on the same repair bill with Defect Card/JIC.

#### T.1 Detail Defect Card or JIC Original Records

When submitting **detail** Defect Card or JIC original records to Data Exchange requiring settlement value adjustment the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator set to the appropriate funds being billed
- Detail Source set to "DC" or "JI" or "DR" or "JR" or "JD"
- Car Initial = 'XXXX'
- Car Number = "123456"
- Kind of Car Symbol
- Load/Empty Indicator set to (U)
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type set to spaces
- Location on Car to default location "B"
- Quantity set to "1"
- Condition Code set to "1"
- Applied Job Code set to "5399"
- Applied Qualifier set to "ZF"
- Why Made Code set to "09"
- Removed Job Code set to "5399"
- Removed Qualifier set to "ZF"
- Responsibility Code set to "3"
- Defect Card/JIC Party must equal the initial of the party issuing the Defect Card or JIC
- Defect Card/JIC Date (YYMMDD) must equal the date from the Defect Card or JIC
- Labor Charge set to zeros
- Material Charge set to the dollar difference between total repair cost and settlement value
- Material Sign set to "C"
- Machine Priceable Indicator set to "N"
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate set to zeros
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date (YYMM)** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must be "JI" or "DC" or "DR" or "JR" or "JD"

**Document Reference Number** is optional. It could be used to hold a file number or some information that would help the billing or billed party

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number** must be set to the repairing party's document reference

Example: Car Owner XXXX repairs their own railcar on December 15, 2013 under authority of endorsed JIC dated December 3, 2013 from Railroad YYYY during Car Owner's January 2014 account month. AAR Settlement Value is \$56,000. Total Billing repair data charges equal \$60,000. AAR Settlement Value is exceeded by \$4,000 and requires credit adjustment to be made within the same accounting month. Car Owner XXXX submits the repair record to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date (YYMM)** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "JI"

**Location on Car** = "B" (default location)

**Applied Job Code** = "5399"

**Removed Job Code** = "5399"

**Why Made Code** = "09"

**Repair Date** = "131215"

**Responsibility** = "3"

**Defect Card/JIC Party** = "YYYY"

**Defect Card/JIC Date** = "131203"

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Material Charge** = "400000"

**Material Sign** = "C"

**Machine Priceable Indicator** = "N"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Settlement Value Adjustment Example					
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces					
	Field Name	Column	Length	Format**	Original Detail Record
	Record Format	1	1	A/N	1

## Appendix U Submitting A Corrected Invoice (Rejected By Railinc Due To Critical Errors)

### How to submit a corrected invoice rejected by Railinc due to critical data errors via the AAR/Railinc Data Exchange system

All invoices with critical data errors are rejected by Railinc upon submission and not forwarded to the Billed Party. All rejected invoices must be corrected and resubmitted as outlined below.

Some examples of critical data errors are:

- All Record 1's (of the same Detail Source group) Total does not match Record 8 (of the same Detail Source group) Subtotal
- Record 8 Subtotal does not match Record 8 Total "ZZ"
- Record 9 Totals do not match sum of the Record 1 charges
- Repairing Party if left Blank
- Billed Party if left blank
- Billing Party/Invoicing Party if left blank, Invoice Number if left blank (Record Format 1 or 6 or 8)
- Account date if left blank (Record Format 1 or 6 or 8)
- Invoice Date if left blank (Record Format 8)
- Invalid or missing required contact types (Record Format 6)

---

**Important Note:** Critical data errors are listed in each submitter Inbound Data Exchange Log Report.

---

Below is an example of an invoice with critical data errors and requirements for submitting corrected records.

### U.1 Example Critical Data Errors (found in Record Format 1 only)

BNSF repairs railcar number NATX 123456 during BNSF's account date 1401 (January 2010) and intends to invoice under Invoice Number "654321". BNSF submits the repair records to the Data Exchange system with the following fields filled in:

**Billing/Invoicing Party** = " " (Note this is incorrect and trips critical error - must be "BNSF")

**Billed Party** = " " (Note this is incorrect and trips critical error - must be "NATX")

**Account Date (YYMM)** = " " (Note account date left blank - must be "1001")

**Invoice Number** = " " (Note invoice number left blank - must be "654321")

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = " " (Note this is incorrect and trips critical error – must be "BNSF")

**Repairing Party Invoice Number** = "654321"

**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Railinc sends an email to the inbound data submitter (Inbound Data Exchange Log Report) with critical and non critical error details.

Submitter notes critical errors and makes the following corrections and resubmits the entire file (including any and all other invoices/details which were part of the first submission and corrected records) within the same account date period. The last file submitted to Railinc in the submission period will be the only file that Railinc processes for that submission period. If you resubmit only the corrected records, only those records will be processed. The submitter has the opportunity to fix their data file and resubmit the entire file (including corrected records) back to Railinc prior to the published deadline so as to get their monthly billing in for the month.

---

**Important Note:** When resubmitting corrections back to Railinc within the same account date period, the submitter MUST resubmit the entire file with the corrected records, to ensure delivery to their billed party(s). If the records are not corrected and resubmitted with the file during that account date period, the submitter will be responsible for including the rejected invoices in a future data exchange submission.

---

BNSF corrects the record(s) in error and resubmits all records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "BNSF"

**Billed Party** = "NATX"

**Account Date (YYMM)** = "1401"

**Invoice Number** = "654321"

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "BNSF"

**Repairing Party Invoice Number** = "654321"

**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## **U.2 Detail AAR Billing Repair Data Records**

When submitting (Detail Source "BR") AAR billing repair data records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Document Reference Number
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party
- Labor Rate
- Repairing Party Invoice Number
- Repairing Document Reference Number
- Repair Facility Type
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge

- Material Sign
- Machine Priceable Indicator set to "Y" if the AAR price master was used to edit/price the record, otherwise set to "N"
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Indicator
- Original Invoice Number
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "BR" for AAR billing repair data billing

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information assigned by the billing or billed party.

**Repairing Party** must be filled in with the repairing party's initial

**Repairing Party Invoice Number** must be filled in with the repairing party's invoice number

**Repairing Party Document Reference Number** filled in with the repairing party's document reference number if present

Corrected Invoice Billing Repair Data Example						
** N = Numeric, right justified, leading zeros, A = Alphabetic, left justified, padded with spaces, A/N = Alphanumeric, left justified, padded with spaces						
	Field Name	Column	Length	Format**	Original Record with Errors	Corrected Record

## Appendix V Resubmitting a Revised Invoice Which was Returned Unpaid Per AAR Office Manual Rule 112

### How to resubmit an AAR Revised Bill via the AAR/Railinc Data Exchange system

Listed below are guidelines for resubmitting a detailed revised AAR bill that was improperly rendered per Rule 112 or had errors or questionable charges exceeding amounts shown in Rule 112.

#### V.1 Detail AAR Billing Repair Data Records

Listed below are guidelines for resubmitting the original detailed revised or new invoice from a returnedunpaid submitted invoice. An AAR bill improperly rendered per Rule 112 or had errors or questionable charges exceeding amounts shown in Rule 112 and returned unpaid back from the "Billed

Party". When submitting (Detail Source "BR") AAR billing repair data records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing Party/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Document Reference Number
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party
- Repairing Party Invoice Number
- Repairing Document Reference Number
- Repair Facility Type
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator set to "Y" if the AAR price master was used to edit/price the record, otherwise set to "N"
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Indicator = "R"
- Original Invoice Number
- AAR Component ID (CID)
- Original Account Date

The following fields must be filled in as indicated below:

**Billing Party/Invoicing Party** must be filled in with the billing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date (YYMM)** must be filled in with the billing party's account date (year/month format)

**Invoice Number** must be filled in with the billing party's invoice number

**Detail Source** must always be set to "BR" for AAR billing repair data billing

**Repairing Party** must be filled in with the repairing party's initial  
**Repairing Party Invoice Number** must be filled in with the repairing party's invoice number  
**Repairing Party Document Reference Number**, if present, must be filled in with the repairing party's document reference number  
**Resubmitted Invoice Indicator** = "R"

Below is an example of an invoice with Rule 112 errors and requirements for submitting revised records.

### **V.1.1 Rule 112 Example 1—Improperly Rendered Invoice**

Railroad XXXX repairs railcar owner ZZZZ during Railroad XXXX's account date 1001 (January 2010) and inadvertently invoices road YYYY under Invoice Number "123456". Railcar owner YYYY takes exception to this invoice as improperly rendered and notifies Railroad XXXX. Railroad XXXX resubmits revised or cancels invoice and submits a new invoice (987654) to ZZZZ. Because the data has already passed through Railinc Data Exchange one time Railroad XXXX indicates "R" in Resubmitted Invoice Indicator field.

Railroad XXXX submits the incorrect original repair record to the Data Exchange system with the following fields filled in:

**Billing Party/Invoicing Party** = "XXXX"  
**Billed Party** = "YYYY" (Note: this was incorrect and should have been ZZZZ)  
**Account Date (YYMM)** = "1401" or "1402"  
**Invoice Number** = "123456" (Note: It is not required to use the original invoice number.) or "987654"  
**Detail Source** = "BR" (Billing repair data)  
**Document Reference Number** = spaces (not filled in)  
**Repairing Party** = "XXXX"  
**Repairing Party Invoice Number** = "123456"  
**Repairing Party Document Reference Number** = "123456" or "987654" if a new invoice was submitted & old one canceled.

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Railcar owner YYYY notifies Railroad XXXX that the invoices are being returned unpaid because of improper Billed Party. All BRCs were for cars owned by Railcar owner ZZZZ.

Railroad XXXX resubmits revised or cancels invoice and submits a new invoice "987654" to proper car owner ZZZZ to the Data Exchange system with the following fields to the Data Exchange system during Account Date 1402 with the following fields filled in and indicates "R" in Resubmitted Invoice Indicator field for all records in the invoice, Account Month can have the original Account Month or the Account Month in which the data is submitted, "1402".

**Billing Party/Invoicing Party** = "XXXX"  
**Billed Party** = "ZZZZ" (Note: this is the revised Billed Party)  
**Account Date (YYMM)** = "1402"  
**Invoice Number** = "123456" (Note: It is not required to use the original invoice number.)  
**Detail Source** = "BR"  
**Document Reference Number** = spaces (not filled in)  
**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "123456" or "987654" if a new invoice was submitted & old one canceled.

**Repairing Party Document Reference Number** = spaces (not filled in)

**Line Number** = "00001"

**Resubmitted Invoice Indicator** = "R" (Note: Because the data has already passed through Railinc Data Exchange one time Railroad XXXX indicates "R" in Resubmitted Invoice Indicator field)

**Original Invoice Number** = "123456" (Note: Original Invoice Number that was first submitted through Data Exchange)

**Original Account Date (YYMM)** = "1001" (Note: Original Account Date that was first submitted through Data Exchange)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

### V.1.2 Rule 112 Example 2—Questionable Charges Invoice

Railroad XXXX repairs railcar owner YYYY during Railroad XXXX's account date 1401 under Invoice Number "123456". Invoice total is \$5000.00. Railcar owner YYYY reviews charges and notes exceptions on the BRC for car YYYY 012345 in the net amount of \$1000.00 (Exception taken for labor charge of 13.0 hours for Job Code 4450, Qualifier "MT"). This exception amount exceeds the threshold noted in AAR Office Manual Rule 112. Railcar owner YYYY notifies Railroad XXXX of the questionable charges and that the invoice is being returned unpaid. If Railroad XXXX agrees with exceptions from Car Owner YYYY, XXXX resubmits revised invoice revised or cancels invoice and submits a new invoice (987654) less lines of the exceptions removed from data submission), to the Data Exchange system during Account Date 1402 with the following fields filled in:

**Billing Party/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date (YYMM)** = "1401"

**Invoice Number** = "123456"

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "123456"

**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Railcar owner YYYY notifies Railroad XXXX that the invoices are being returned unpaid because of questionable charges exceeding the threshold of AAR Office Manual Rule 112.

Railroad XXXX resubmits revised invoice or cancels invoice and submits a new invoice (987654) during account date 1402 to the Data Exchange system with the following fields filled in and indicates "R" in the **Resubmitted Invoice Indicator** field for **all** records in the invoice. Account Month can have the Original Account Month or the Account Month in which the data is submitted, "1402".

**Billing Party/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date (YYMM)** = "1401" or "1402"

**Invoice Number** = "123456" (Note: It is not required to use the original invoice number.) or "987654"

**Detail Source** = "BR" (Billing repair data)  
**Document Reference Number** = spaces (not filled in)  
**Car Initial** = "YYYY"  
**Car Number** = "012345"  
**Repairing Party** = XXXX  
**Repairing Party Invoice Number** = "123456" or "987654" if a new invoice was submitted & old one canceled.  
**Repairing Party Document Reference Number** = spaces (not filled in)  
**Line Number** = "00001"  
**Resubmitted Invoice Indicator** = "R" (Note: Because the data has already passed through Railinc Data Exchange one time, Railroad XXXX indicates "R" in Resubmitted Invoice Indicator field)  
**Original Invoice Number** = "123456" (Note: Original Invoice Number that was first submitted through Data Exchange)  
**Original Account Date (YYMM)** = "1401" (Note: Original Account Date that was first submitted through Data Exchange)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

### **V.1.3 Rule 112 Example 3—Rejected Invoice, Resubmitted with Additional Billing Repair Data Added to a New Invoice in a Future Billing Month**

Railroad XXXX repairs railcar owner YYYY during Railroad XXXX's account date 1401(January 2010) under Invoice Number "123456". Invoice total is \$5000.00. Railcar owner YYYY reviews charges and notes exceptions on the BRC for car YYYY 012345 in the net amount of \$1000.00 (Exception was an excessive labor charge of 13.0 hours for Job Code 4450, Qualifier "MT"). The revised fields are completed as follows:

Railroad XXXX submits the incorrect original repair record to the Data Exchange system with the following fields filled in:

**Billing Party/Invoicing Party** = "XXXX"  
**Billed Party** = "YYYY"  
**Account Date (YYMM)** = "1401"  
**Invoice Number** = "123456"  
**Detail Source** = "BR" (Billing repair data)  
**Document Reference Number** = spaces (not filled in)  
**Repairing Party** = "XXXX"  
**Repairing Party Invoice Number** = "123456"  
**Repairing Party Document Reference Number** = spaces (not filled in)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

Railcar owner YYYY notifies Railroad XXXX that the invoice is being returned unpaid because of questionable charges exceeding the threshold of AAR Office Manual Rule 112. Railroad XXXX submits to Data Exchange the revised BRC(s) on a future Invoice account date 1403 under Invoice Number "234567" with other BRC(s) that were not previously submitted.

If Railroad XXXX agrees with exceptions from Car Owner YYYY, XXXX resubmits revised invoice (less lines of exception), to the Data Exchange system with the following fields and indicates "R" in **Resubmitted Invoice Indicator** field for ***all*** records in the invoice that were previously submitted.

**Billing Party/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date (YYMM)** = "1003"

**Invoice Number** = "234567" (Note: It is not required to use the original invoice number.)

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Car Initial** = "YYYY"

**Car Number** = "012345"

**Repairing Party** = XXXX

**Repairing Party Invoice Number** = "234567"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Line Number** = "00001"

**Resubmitted Invoice Indicator** = "R" (Note: Because the data has already passed through Railinc Data Exchange one time, Railroad XXXX indicates "R" in Resubmitted Invoice Indicator field)

**Original Invoice Number** = "123456" (Note: Original Invoice Number that was first submitted through Data Exchange)

**Original Account Date (YYMM)** = "1001" (Note: Original Account Date that was first submitted through Data Exchange)

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

**Example 1—Resubmitting a Revised Invoice which was Returned Unpaid—Improperly Rendered Invoice**

## Appendix W Joint Inspection/Defect Card Billing for Retired/Dismantled Unit (Rule 102.D.9)

**How to submit joint inspection certificate (JIC) or Defect Card billing via the AAR/Railinc Data Exchange system when a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9)**

When an owner receives a car home with a defect card for unfair usage damage or is in possession of a car that has an endorsed JIC, and the owner elects to retire/dismantle instead of repair car and/or rack, charges representing estimated repairs may be made for material and labor as would have been required for repairing or renewing items actually listed on defect card/JIC. For JIC billing in this case, detail source code "JD" (Joint Inspection/Defect Card Billing for Retired/Dismantled Unit) must be used when a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9).

---

**Important Note:** Detail Source "JD" (Joint Inspection/Defect Card Billing for Retired/Dismantled Unit), is **only to be used when** a car owner elects to retire/dismantle a damaged car instead of making repairs (per Office Manual Rule 102.D.9).

---

When submitting **detail JIC original** records to Data Exchange the following fields must be filled in as required based on the repairs performed.

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repair Facility Type
- Repairing Party
- Repairing Party Invoice Number
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Defect Card/JIC Party
- Defect Card/JIC Date
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number

The following fields must be filled in as indicated below:

**Billing/Invoicing Party** must be filled in with the repairing party's initial

**Billed Party** must be filled in with the billed party's initial

**Account Date** must be filled in with the repairing party's account date (year/month format)

**Invoice Number** must be filled in with the repairing party's invoice number

**Detail Source** must always be set to "JD" for JIC Joint Inspection/Defect Card Billing (Retired/Dismantled Unit)

**Document Reference Number** is conditional. Only required for Detail Source "CB". Required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.

**Repairing Party** must be set to the repairing party's initial

**Repairing Party Invoice Number** must be set to the repairing party's invoice number

**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number

Example 1: Railroad YYYY damages car XXXX123456 owned by Car Owner XXXX on November 3, 2013.

While in possession of XXXX123456, Car Owner XXXX performs a financial analysis and elects to retire/dismantle XXXX123456 under authority of endorsed JIC dated November 15, 2013 from Railroad YYYY. Car Owner XXXX submits the billing record representing estimated repair costs during Car Owner's January 2014 account month to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1401"

**Invoice Number** = "12345"

**Detail Source** = "JD" (Joint Inspection/Defect Card Billing - Retired/Dismantled Unit)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Defect Card/JIC Party** = "YYYY"

**Defect Card/JIC Date** = "131115"

The rest of the fields on the Format 1 record are filled in based on the repairs as would have been required.

## Appendix X AAR Component ID (CID) Reporting

**How to submit AAR Component ID billing repair data via the AAR/Railinc Data Exchange system to be billed during the Monthly Billing Cycle.**

**Note:** Refer to Appendix W for reporting components under Detail Source JD.

Component Tracking Reporting Requirement Dates Table		
Component	DX Informational Error	DX Mandatory Reject
Wheel Sets (FM 44)	January 1 <sup>st</sup> 2013	October 1 <sup>st</sup> 2013
Couplers, Side frames, Bolsters (FM 16, 17, 18, 47, 48)	January 1 <sup>st</sup> 2014	July 1 <sup>st</sup> 2014
Service portion, Emergency portion (FM 4)	January 1 <sup>st</sup> 2016	July 1 <sup>st</sup> 2016
Slack Adjusters (FM 8)	October 1 <sup>st</sup> 2016	April 1 <sup>st</sup> 2017
EOC Cushion Units (FM 59)	November 1 <sup>st</sup> 2020	April 1 <sup>st</sup> 2021

**Important Note:** Job Codes requiring a Component ID are identified in the AAR Price Matrix by the field "CID (Y/N):" where the indicator is shown as "Y" as noted in the example below.

JOB 3333	NEW WHEEL SET 33 INCH, 6 X 11 AXLE										QLFR - 00	RULE	44
SINGLE UNIT LOCATION	1 2 3 4										MAX UNITS		1
ARTICULATED LOCATION	1 2 3 4 5 6 7 8 9 X Y Z										MAX UNITS		1
DRAW BAR LOCATION	1 2 3 4 5 6 7 8 9 P Q R S T U V W Y Z										MAX UNITS		1
MATL UNIT-- EACH	CID (Y/N) : Y SECUREMENT PART-										SEC. QTY		0.000
REMOVED	COND	WHY MADE		RESP CODE	MATERIAL	STD HRS		LABOR		CREDIT		PRICE	
3333	1	09		1,3	2450.00	0.837 (V)		100.44 (V)		0.00		2550.44	
3333	1, 3, 4, ,5	09		2	0.00	0.000		0.00		0.00		0.00	
3333	3	09		1,3	2100.00	0.837 (V)		100.44 (V)		0.00		2200.44	
3333	4	09		1,3	1504.80	0.837 (V)		100.44 (V)		0.00		1605.24	
3333	5	09		1,3	1528.10	0.837 (V)		100.44 (V)		0.00		1628.54	

Listed below are guidelines for submitting AAR Component ID and Billing Repair data.

**Note:** Refer to AAR Field Manual Rules 4, 8, 16, 17, 18, 44, 47, 48, 59 and/or Rule 72, Section F, for Billing Repair data requirements.

### Car Part Codes for Components:

AC – air brake emergency portion

FJ – truck side frame

AK – air brake service portion

FN – wheel

DD – slack adjuster

GQ – cushioning device – end of car

FF – truck bolster

HR – coupler body

**Note:** Refer to AAR Field Manual Rule 83 for additional information.

## **Detail AAR Billing Repair Data Records**

When submitting (Detail Source "BR, DC, DR, JI, JR, OT, RE, SH") AAR billing repair data records to Data Exchange the following fields must be filled in as required based on the repairs performed:

- Record Format (must be "1")
- Billing/Invoicing Party
- Billed Party
- Account Date (YYMM)
- Invoice Number
- Price Master Currency Indicator
- Detail Source
- Car Initial
- Car Number
- Kind of Car Symbol
- Load/Empty Indicator
- Repair Date (YYMMDD)
- SPLC
- Repairing Party
- Repairing Party Invoice Number
- Repair Facility Type
- Location on Car
- Quantity
- Condition Code
- Applied Job Code
- Applied Qualifier
- Why Made Code
- Removed Job Code
- Removed Qualifier
- Responsibility Code
- Labor Charge
- Material Charge
- Material Sign
- Machine Priceable Indicator set to "Y" if the AAR price master was used to edit/price record, otherwise set to "N"
- Wrong Repair Indicator
- Narrative & Wheel Information set to some meaningful description as defined in C.3
- Labor Rate
- Expanded SPLC
- Repair Facility Arrival Date (YYMMDD)
- Line Number
- Resubmitted Invoice Number
- Original Invoice
- Original Account Date
- AAR Component ID (CID)

The following fields must be filled in as indicated below:

- Billing/Invoicing Party** must be filled in with the repairing party's initial  
**Billed Party** must be filled in with the billed party's initial  
**Account Date** must be filled in with the repairing party's account date (year/month format)  
**Invoice Number** must be filled in with the repairing party's invoice number  
**Detail Source** must be set to one of the following " BR, DC, DR, JI, JR, OT, RE, SH " for AAR billing repair data  
**Document Reference Number** is conditional. It is only required for Detail Source "CB" and is required for CBA number. It could be used to hold a file number or some information that would help the Billing or Billed Party.  
**Repairing Party** must be set to the repairing party's initial  
**Repairing Party Invoice Number** must be set to the repairing party's invoice number  
**Repairing Party Document Reference Number**, if present, must be set to the repairing party's document reference number.  
**Applied Job Code** must be filled with a net applied valid job code.  
**AAR Component ID (CID)**, must be filled with the unique alpha numeric component identifier for the component being applied. 14 position field.

**Example 1:** (Note: Not all applicable job codes will be listed in the examples. Not all additional job code components required when reporting a wheel will be listed in the examples. Refer to FM Rule 44.E.2 for details for all required fields.)

Railroad XXXX repairs car owner YYYY's railcar during railroad XXXX's March 2014 account month. Railroad XXXX applies a wheel set with a valid Applied Job Code of 3336 with AAR Component ID of "ABCD1234567890". Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1403"

**Invoice Number** = "12345"

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Location on Car** = "01"

**Applied Job Code** = "3336"

**AAR Component ID (CID)** = "ABCD1234567890"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

**Example 2:** (Note: Not all applicable job codes will be listed in the example. Not all additional job code components required when reporting a wheel will be listed in the examples. Refer to FM Rule 44.E.2 for details for all required fields.)

Railroad XXXX repairs car owner YYYY's railcar during railroad XXXX's March 2014 account month. Railroad XXXX applies a wheel set with the valid Applied Job Code of 6999 and the Car Part Code of "FN" with AAR Component ID "ABCD0987654321". Railroad XXXX submits the repair records to the Data Exchange system and fills in the following fields:

**Billing/Invoicing Party** = "XXXX"

**Billed Party** = "YYYY"

**Account Date** = "1403"

**Invoice Number** = "12345"

**Detail Source** = "BR" (Billing repair data)

**Document Reference Number** = spaces (not filled in)

**Repairing Party** = "XXXX"

**Repairing Party Invoice Number** = "12345"

**Repairing Party Document Reference Number** = spaces (not filled in)

**Location on Car** = "01"

**Applied Job Code** = "6999"

**Car Part Code** = "FN"

**AAR Component ID (CID)** = "ABCD0987654321"

The rest of the fields on the Format 1 record are filled in based on the repairs performed.

## Appendix Y Exceptions per AAR Office Manual Rule 112.H

Exceptions are a disagreement with a BRC (Billing Repair Card, as defined in Rule 83 exhibit "A") line item, or to an entire BRC, that is brought to the attention of the Billing Party by the Billed Party. Billing exceptions may include, but are not limited to, such issues as incorrect car initials/numbers, incorrect repair dates, incorrect pricing, AAR rule violations, invalid repairs based on car type or car configuration, repairs related to EHMS alerts where no alert is found in the EHMS data, excessive quantities, excessive hours, or excessive material charges.

### Y.1 How to Submit Exceptions to a Billing Party for Charges Received for AAR Car Repair Billing

This section lists guidelines for submitting exceptions to a Billing Party.

There are two types of exceptions to AAR Car Repair Bills:

1. Unpaid Invoices – follow AAR OM Rule 112.H.3
2. Paid Invoices – follow AAR OM Rule 112.H.4

Exceptions are handled outside of the AAR Data Exchange (DX) and are presented in a letter type format, addressed to the Billing Party that is listed in FindUs.Rail (per AAR Office Manual Rule 114), and/or invoiced to the party to whom exceptions should be addressed. Exceptions should be emailed to the address shown in FindUs.Rail.

Examples of exception letters per AAR Office Manual Rule 112.H. are as follows and are emailed to the billing party for consideration of reducing the dollar amount charged. If the response from the Billing Party (to whom the exception was sent to) is not agreed to, a second letter of exception may be sent debating the issue of charges. This second letter of exception may not contain any new exceptions in addition to those questioned in the first letter.

Submitted exceptions can be either in an email only or sent by email with an attachment. In either case, the email subject should clearly state that it is an exception to a particular invoice.

Here are two examples of email subject lines:

**Note:** SCAC stands for Standard Carrier Alpha Code, and is a Railinc registered identifier used as a MARK.

- Ex\_Letter – SCAC (of company receiving invoice) - 03/2016 (date of invoice) – SCAC (of billing company) Inv 023456789
- SCAC (of company receiving invoice) Exception Letter to SCAC (of billing company) Invoice Number 023456789, Dated 03/01/16 (date of invoice)

#### Y.1.1 Examples of Exceptions that are Not Valid

This section contains examples of submitted exceptions that are not acceptable:

- Exceptions being taken to Wheelsets, Draft Gears, and Brake Beams to verify new material. Taking exception using the full price charged. When asked to verify, the amount should be \$0 or the difference between new and reconditioned.

- Duplicate billing (when previous invoice was rejected and CRB is being re-billed).
- Duplicate billing when previous repair fell within 60 days.
- Air hose not out of date (when it is either A/B end issue, or date last air hose was installed combined with age of hose at time of installation meets replacement standards) No verification sent with exception.
- Repair is out of date (when previously rejected multiple times).
- Brake shoe not standard to car (when it is acceptable per AAR rules – also Carmen replace shoes in kind).
- Material price greater than AAR Price Master (when it is not).
- Car does not exist in UMLER (when it does, or alternately was in UMLER at the time of repair).
- Not all exceptions filed at the same time.
- ABT not out of date-documentation provided (data provided is not supported by RAILINC).
- Wheel not High Impact at the time of repair-provides graph but no documentation from Railinc.
- “Removed Wheel data does not match previous application” – Not rule based, and no verification provided of what car owner believed was on the car. Billing Party only knows what they applied not what others have billed car owner.
- Car Kind Symbol when it is not applicable to repair made.

### **Y.1.2 Exception Correspondence**

The following must be included in the Exception Correspondence:

1. Invoice number.
2. Date of invoice.
3. Address of the contact that handles exceptions as listed in FindUs.Rail.
4. The exact intent of the exception (see below):
  - a. Find attached an Exception Letter for Inv# xxxxxxxxxxx.
  - b. The exceptions for AAR Paid Invoice Number xxxxxxxx, dated xx/xx/xx, are attached.
  - c. In accordance with AAR Office Manual Rule 112.H.4.b., please see attached exception letter submitted by xxxxxxxxxxx. As Agent for xxxxxxxx taken against the car repair billing invoice captioned in the Subject line. After your review, please send your reply by the preferred method electronically along with corresponding CBA to: email.com.
  - d. The following exceptions are taken to charges appearing in this bill/invoice # xxxxxxxxxxx. Payment Of This Invoice Has Been Rejected According to Rule 112.H.3.
5. Line number of exception identified on submitted BRC.

### **Y.1.3 Excerpt from the AAR Office Manual**

The following is an excerpt from Rule 112.H.4 in the *AAR Office Manual*. Refer to the actual *AAR Office Manual* for the most complete and current information.

#### **112.H. Invoice Processing and Auditing Regulations**

:

- e. All exceptions shall be taken at the same time. (Does not apply to exceptions covered by time limit guarantee, duplicate billing, wrong repairs per Rule 111, Rule 85 material billed per Rule 111, or billing in excess of the car's net settlement value.)
- f. Billing Repair Data where exceptions are being taken, must match the original data and must be presented in the format as defined in Rule 83, Exhibit A. The correct information, as shown on the original record of repair, must be furnished.
- g. When exceptions are taken to a paid invoice, only the documentation for the repair event(s) with exceptions should be submitted to the Billing Party.
- h. Exceptions may be taken by one of the following methods. In either case, reference must be made to invoice number, date of invoice, and accounting month in which charges were included.
  - (1) Each exception must be fully detailed in letter form and must be supported by the document defined in Rule 112.H.4.f.
  - (2) Each exception must be clearly stated adjacent to alleged improper line item on face of the document defined in Rule 112.H.4.f.
  - (3) Exceptions must reference the original line number as submitted by the Billing Party.
